

The People's Column

Altogether the weather man has continued to avoid giving Bryan rain and lawns are dry and paths that are used in lieu of sidewalks are dusty, there is every prospect that before many weeks the dust will be well mixed with water and the going will not be so good.

It would seem that if there is any regard for convenience, or comfort or health on the part of many Bryan citizens who boast no sidewalks in front of their homes, that they would arrange to lay a few yards before the winter season opens.

Unless this is done these residents and their neighbors will go slouching along the better part of the winter and the chances that cough syrup and doctor bills, incident to colds from wet feet, would pay a large part of the needed paving.

Bryan is about as far behind in this respect as she was ten years ago, and it would seem that, progressive as the city is in many other respects, arrangements would be made for the comfort and safety of the pedestrian as well as for that of the motorist.

London, England, September 27, 1929. Here I am in London. I've been here just three days but have sure enjoyed myself. I've got enough (Continued on Page 6)

ABOUT BRYAN

Mrs. Lee J. Rountree left today for Dallas where she will attend Legislative Day, Oct. 17 and Press Day, Oct. 18 in connection with the State Fair, going via Bartlett and Waco for a brief visit with relatives and friends.

E. R. Bryant, manager of the local J. C. Penney Co. store, has returned from the fall convention of that concern's managers and supervisors held recently in Dallas. He reports plans for late fall and early winter business to be the most comprehensive in the history of his company.

Mrs. C. A. Woods and Mrs. J. M. Woods of Somerville, mother and aunt of Mrs. Chas. Myers are in Bryan today visiting Mrs. Myers.

Texas Educators Hold Meeting at Texas A-M Today

Representatives of Senior Colleges in Texas have returned to their homes today following a conference held at A. and M. College yesterday and today at which matters of interest to institutions of higher learning in the state came under consideration and discussion.

College representatives who visited A. and M. to attend the conference included: Dr. H. Y. Benedict of Texas University, Austin; Pres. R. L. Marquis, North Texas Teachers' College, Denton; Dean E. V. White, College of Industrial Arts, Denton; Dr. A. W. Birdwell, Stephen F. Austin Normal School, Nacogdoches, and Dr. H. F. Estill, Sam Houston Normal, Huntsville.

"Hoot" Owls Disturb the Sleep and "Mr. Possum" the Chicken Roosts Of Bryan, During Long Fall Nights

Many Bryan citizens have reported lately that "hoot" owls are heard nightly in the trees near their homes within the city limits, in fact in the thickly built residence portions. Where there is a big oak tree convenient, these owls perch for the night, and as they "hoot" to the moon, disturb many of the superstitious, with a feeling of awe and expected disaster until sleep relieves their eyes for the night. With the morning's early rays, these owls return to their day homes in the woodlands near by, and the late sleepers lose opportunity to "scare, cripple or kill" the disturbers.

Now, the festive "possum" is "walkin' round" in Bryan, making himself at home, and taking possession in many poultry houses "over night." This morning as early breakfasters sat at tables on the porch two blocks from Main Street, a "big fat" possum fit for "latter dressing" was seen walking slowly along on the top of the yard fence. Discovering the visitor the neighbors with sticks and staves, went out to kill and discovered a baby "possum" also taking the walk with Ma "Possum." Both the big and little one were killed, but, as persimmons are not yet falling, they were not fat enough for a roast, and the hunters were disappointed.

Whether the progress of Bryan is so evident and so steady that even the dumb animals and birds are coming in to take a last look at the "old home town" or whether the news of the big concrete highways to cross the country east and west has been rumored in forest and field, until they are out in search for a new home, is puzzling many Bryanites these autumn days.

WEATHER

NEW ORLEANS, Oct. 16.—For Bryan and vicinity: Generally fair tonight; Thursday partly cloudy. East Texas: Fair tonight and Thursday. Partly cloudy. West Texas: Partly cloudy with scattered showers in south portion tonight and Thursday.

Inquiry In Scope Of Volstead Act Proposed

JURY FREES AXE-SLAYER OF WIFE AND LOVER TODAY

Governor May Restore Civil Law In Borger Today

MOODY SIGNED ORDER BEFORE HUNTING TRIP

New Officials Must Be Named Before Order Is Issued

CALHOUN TO APPROVE

Appointments, None of Them To Seek Re-Election

(By Associated Press) EASTLAND, Oct. 16.—Hutchinson county will be free of martial law today if the appointment of officials for the county and Borger is completed, Acting Governor Barry Miller said today.

Before leaving for a Mexican hunting trip Governor Moody signed the proclamation to lift martial law, the order to be dated and issued immediately upon the completion of the appointments, the acting governor said.

W. A. Henderson, townsite developer and hotel owner, was elected mayor by the city commission Tuesday with the approval of District Attorney Clem Calhoun. As soon as the election was confirmed J. W. Crabtree, city commissioner and deposed chief of police, resigned and Dyke Culum, an automobile agent, was elected to the commission.

A third commissioner to succeed J. E. Higgins is expected to be elected today or tomorrow. The names of Moe Steinberg, a merchant; Wayne O'Keefe, an insurance man; and Guy Coffee, a merchant were suggested for the third place on the commission by a group of business men from the north side of town headed by John R. Miller, former mayor. John Farmer, a former policeman, was suggested as a candidate for constable and Jim Miller and L. E. Brain were suggested as possible timber for justice of the peace. All of these offices were vacated by resignation.

Constable Reeves and Justice of the Peace Miller at Stinnett will be restored to office when martial law is lifted, Gen. Jacob Wolters, commanding the soldiers here said. Calhoun announced that Albert Mace, former state ranger and at one time sheriff at Lampasas who straighten up affairs in Mexico after martial law was declared in 1922, would come here at his request to consider taking over the duties of chief of police.

Calhoun made it plain that no one could accept office with his (Continued on Page 6)

HOOVERS SEE ATHLETICS WIN TITLE

This Associated Press telephoto shows President and Mrs. Hoover at Shibe park during the fifth game of the World Series which Philadelphia won from Chicago, annexing the baseball title. Left to right, Attorney General Mitchell, Mrs. Hoover, the President, in box at game.

MACHINE GUN EXECUTION OF BIG ELEPHANT

KILLER CORSICANA WOMAN LAST SATURDAY TO BE KILLED TONIGHT

(By Associated Press) KENEDY, Oct. 16.—Accompanied by three other pachyderms and several hundred people, Black Diamond, the killer elephant, was marched to a field near here today where he will be executed at twilight by a one man firing squad at one of the death of a Corsicana woman Saturday.

A machine gun carried by the circus for animal breaks will pump a stream of lead into its brain from a point back of the ear.

Trapper Assigned To One Lone Wolf

(By Associated Press) PRADY, Oct. 16.—One lone wolf remains in McCulloch county, and a trapper has been assigned to get his scalp.

For the last seven years the McCulloch County Wolf Club has carried on a war on predatory animals, with the result that the livestock and poultry ranges today are almost entirely rid of the wolf and coyote. At the annual meeting of the club, it was reported that only one known wolf is in the county at present and that a special trapper had been put on its trail.

Miller Is Acting Chief Executive Of Texas Today

(By Associated Press) AUSTIN, Oct. 16.—Lieutenant Governor Barry Miller of Dallas is acting governor of Texas today. Governor Dan Moody entered Mexico at 6 o'clock this morning on a hunting expedition to the Sierra Madre mountains. This is the third time the lieutenant governor has performed the functions of the chief executive.

Fast Service Given On Eagle's Pictures

An example of the news value and up-to-dateness of the news picture given its readers by the Daily Eagle is found in the view of President Hoover and his party at the deciding game of the world series, played in Philadelphia, Monday, which is shown on the first page today.

The photograph of the party was made in Shibe Field grand stand just as the game began. This was sent to Chicago by the telephoto process. A cut was made from the photograph and then mats were made. These were sent out by air mail and the one used by the Eagle today was received at 8:30 o'clock this morning, about 40 hours after the photograph was made in Philadelphia.

ROLLING STOCK FOR MEXICO

(By Associated Press) MEXICO CITY, Mex., Oct. 16.—Eight million dollars worth of rolling stock has been acquired by the National Railways from American concerns during the last few months. The equipment includes new passenger coaches and freight cars.

Refusal of Bail In Murder Case Is Upheld Today

(By Associated Press) AUSTIN, Oct. 16.—The court of criminal appeals today upheld the trial court at Fort Worth in a refusal to grant bail to Tenila Moore, negro, alleged to have killed a Fort Worth policeman.

MOST COTTON GATHERED

(By Associated Press) TROUP, Oct. 16.—Four-fifths of the cotton crop in the east Texas and Louisiana territory of the Cotton Belt railroad has been gathered. F. T. Cole, agricultural commissioner, said. Nearly every county reported a much smaller yield than last year and the northern Louisiana average was far ahead of that of east Texas.

70-YEAR WIFE USES AXE TO KILL HUSBAND

TELLS POLICE SHE COULD NO LONGER STAND HIS ABUSE

(By Associated Press) SUMMIT, New Jersey, Oct. 16.—Mrs. Laura Mathilda Titus, white haired and wrinkled by 70 years of life, today killed her 78 year old husband with an axe. She confessed the killing to the police after a brief questioning. She said she slew her husband because she couldn't endure any longer his abuses.

Gray Veterans' Staff Is Named By Gen. Summers

(By Associated Press) NACOGDOCHES, Oct. 16.—General J. H. Summers of Nacogdoches, commander of the Texas Division, United States Confederate Veterans has appointed five staff workers to help carry on the concerns of the gray.

They are: J. H. Thorn of Dallas, adjutant general and chief of staff; Mrs. S. A. Hayden, assistant to the general chief of staff; Mrs. George H. King of Houston, sponsor on the general's official staff; Robert Lindsey of Nacogdoches, quartermaster general; Ola H. Beaubien of Houston, staff correspondent.

It also has been announced that Confederate day at the State Fair of Texas in Dallas will be Tuesday, Oct. 22.

INTEND TO MARRY

Two Brazos county couples filed notice of intent to marry and applications for marriage licenses with County Clerk Jess B. McGee Tuesday. They were T. J. Krolek and Agnes Wroblewski and Henry N. Weaver and Edna Louise Touchstone.

COTTON MARKET

The cotton market was off today. Futures closed from 7 to 9 points down. New cotton was quoted from 17 3-8 to 18 cents.

SOLDIER MADE INSANITY WIN HIM FREEDOM

Told Jury He Went Completely Crazy

SECOND INDICTMENT

For Death of Man Is Not Likely To Be Tried

(By Associated Press) EL PASO, Oct. 16.—Less than seven hours after the trial started a jury last night freed Harrison Waitt, Fort Bliss soldier who killed his wife and lover with an axe, of a murder charge in connection with his wife's death.

An indictment in connection with the death of Gordon Rose his wife's lover still faces Waitt, but it was indicated the state may dismiss it.

Temporary insanity was the plea that saved the soldier. He went "completely crazy" he said, from the witness stand, when he found his best friend had "betrayed his home."

10,000 Catholics In Mighty Choir Houston, Oct. 27

(By Associated Press) HOUSTON, Oct. 16.—A massed choir's might outpouring of song will be the central note in a spectacular demonstration in honor of the feast of Christ the King to be participated in by about 10,000 Catholics of the diocese of Galveston here Sunday afternoon, Oct. 27.

The demonstration will be held on the grounds of the novitiate of Villa de Matel beginning with Solemn Benediction of the Blessed Sacrament. The Rt. Rev. Christopher E. Byrne, bishop of Galveston, will preach and Will E. Kendall will make an address on behalf of the Holy Name Union. The Rev. Jerome Rapp of Sacred Heart Church will be master of ceremonies.

P. A. Agenend, choir director of the Holy Name Church here will lead the great choir in the open. Delegations representing Holy Name societies will come from Beaumont, Port Arthur and Orange on the east; from Palestine and Waco on the north; from Schulenberg and other points on the west, Galveston and others to the South. Some 50,000 persons attended the Holy Name societies' demonstration at Washington some months ago.

Term in Prison Of 2 Years for Malice Murder

(By Associated Press) FORT WORTH, Oct. 16.—Two years in the penitentiary for killing J. Reynolds Gunt was the penalty imposed on H. J. Kelly by a jury today. Kelly was found guilty of murder with malice.

Local Musicians On Air Tonight

The radio program to be given over Station WTAW at A. & M. College tonight from 8 to 9 o'clock will feature a group of local vocal artists in solos, duets and ensemble numbers and will present Misses Mary Jones, Mabel Clair Wrenn and Mildred Sallee; Pat Newton, Oatis Gayle and John Boriskie. Miss Maudelle Wiley will be the piano accompanist.

Madam Curie Here

Famous Frenchwoman and discoverer of radium reaches the United States Tuesday. Comes to attend banquet in honor of Thomas A. Edison at Detroit, Oct. 21.

TWO SUSPECTS ARE GRILLED IN COP DEATH

SHOOTING OF NOCONA CITY MARSHALL LEADS TO ARRESTS

(By Associated Press) FORT WORTH, Oct. 16.—Walter Reagan, held here on a charge of murder after the fatal shooting Saturday night of Ed Powell, Nocona city marshal, was questioned today by Tarrant county officers. The prisoner was brought here yesterday and placed in the county jail for safe keeping.

A second suspect, Claud Dix, is held in Montague county jail also under a charge of murder in connection with the shooting.

Washington City Discussed Today By Woman's Club

The first program meeting of the Woman's Club was held at the old club rooms in Carnegie library building this afternoon at 3 o'clock.

The program of the day, the first in the course on "Travel," included the following: Washington—City of Magnificent Distances; leader of the program, Mrs. A. M. Waldrop.

Music, Mrs. J. H. Conway. Washington, The Old: Early Struggles for Democracy, Mrs. R. O. Allen.

Private Life: Comedy—Social Forces, Mrs. Albert Buchanan. Tragedy—Political Intrigue—Mrs. H. G. Fulgham.

Washington, The New: Physical Aspects, Discussion: Moot Political Questions. Agricultural Relief—Mrs. E. W. Crenshaw.

Prohibition—Mrs. W. H. Cole. Mrs. Gann Sees It Through—Mrs. W. B. Cline.

MIDGET WEDDING ENTRANTS

Additional entrants in the contest to select a bride and groom for the midget wedding to be staged by Travis P. T. A. are: Brides, Joan Fender and Jeanne Neil. Grooms, Billy Roman.

President Hoover who has consistently championed a comprehensive development of internal waterways will see the completion of an important step in that plan when he visits Cincinnati on Oct. 22. At that time, the president is going to make the principal address in connection with a celebration which marks the opening of the 9-ft. river stage between Pittsburgh and Cairo, Ill., a distance of 980 miles. Thus the Ohio stands as the first completed successful

SEN. SHEPPARD IS STILL AFTER THE CUSTOMER

Suggests Inquiry Into Present Status of Purchaser

INDICT PURCHASERS

If Evidence Warrants, Says U. S. Judge In Kentucky

(By Associated Press) WASHINGTON, Oct. 16.—An inquiry to determine whether the government may prosecute the buyers of liquor under section 6 of the Volstead act, which prohibits the manufacture, sale or purchase of liquor without a permit, was proposed today by Senator Sheppard, democrat of Texas, author of the 18th Amendment.

(By Associated Press) LOUISVILLE, Ky., Oct. 16.—The October grand jury of the United States District Court here Tuesday was under instruction from Judge Charles I. Dawson, to indict, if the evidence warranted, the buyer as well as the seller of liquor.

Attacking the "so-called good citizen" who patronizes bootlegging (Continued on page 6)

Body of Patriot Sent to Austin From Grimes Co.

The remains of Texas patriots, John Grimes and his wife, were exhumed at Navasota this week, where they have lain through so many long years and have been sent to Austin for reinterment in state cemetery with other Texas heroes and patriots. The funeral service for their reinterment will be held in Austin tomorrow.

The county of Grimes was named for John Grimes, who came to Texas from North Carolina in 1829 and was one of the signers of the Texas Declaration of Independence.

Toy Pistol Caps Bring Suit for \$50,000 Damages

(By Associated Press) HOUSTON, Oct. 16.—A 20 cent toy pistol and some caps sold by a local "five and ten" store to nine year old Thomas Szilsky of Del Rio has brought the concern a \$50,000 damage suit.

Thomas' parents, Mr. and Mrs. J. F. Szilsky, in the action asserted that one roll of the caps contained dynamite or some other high explosive. For, they claimed, when Thomas sought to fire his pistol, it exploded in his hand, blowing away the thumb and a part of a finger, putting out his right eye, injuring his left eye and disfiguring his face.

Hoover to Stress Importance of Inland Waterways in Cincinnati Address, Opening Ohio 9-ft. Stage

President Hoover who has consistently championed a comprehensive development of internal waterways will see the completion of an important step in that plan when he visits Cincinnati on Oct. 22. At that time, the president is going to make the principal address in connection with a celebration which marks the opening of the 9-ft. river stage between Pittsburgh and Cairo, Ill., a distance of 980 miles. Thus the Ohio stands as the first completed successful unit of the projected 9,000 mile inland waterways system of the United States. The seasonal menace of low water has been eliminated and in both winter and summer shippers will be assured a minimum of 9 feet of water. This development comes as the culmination of more than 50 years of work on the Ohio at a cost somewhat in excess of \$110,000,000. In this stretch of water there are now 49 locks although (Continued on page 6)

SON ON HEAD AND SUFFERS BROKEN NECK

Son of J. H. Carroll And Lived At College

CAUSE OF ACCIDENT

Not Known As Youth Was Alone On Tower

J. H. Carroll, aged 22 years and employed at the Texas A. and M. College power plant, was almost instantly killed about 10 o'clock this morning when he fell from the tower, about 75 feet to the ground. Unconscious when picked up, Carroll was rushed to the college hospital but died just after being taken there. Examination showed that his neck had been broken and it is believed he struck the ground head first.

Carroll had been employed at the power house for about two years and was regarded as a dependable and steady employee and was well thought of by his associates and superiors.

How the accident happened is not known as no one was on the tower at the time with Carroll and what caused him to lose his footing is not known.

Carroll was the son of Mr. and Mrs. J. H. Carroll, who live at College Station, Mr. Carroll being an operator at the tower on the railroad south of College Station. He also is survived by four brothers and three sisters, all of whom are at home at this time. They are George, Marshall, Willie and an infant brother, Odell. Sister, Pauline and Effie Russell. No funeral arrangements have been made, according to a statement by the Damsby Furniture Co., to whose morgue the body was taken.

Funeral services will be held at 3:30 o'clock tomorrow afternoon at the Carroll home and interment will be made in the Bryan city cemetery.

Future Farmers To Attend Meet At Dallas Fair

(Special to The Eagle)

COLLEGE STATION, Oct. 12.—More than 1,000 Texas high school students of vocational agriculture, members of the Future Farmers of Texas organization, have already indicated they will attend the two-day session of the organization Oct. 26-27 at Dallas during the State Fair of Texas. L. K. Alexander, of the school of vocational teaching, A. & M. College of Texas, who is state adviser of the organization, has announced.

The meeting at Dallas will be the second state meeting of the organization and the first at the State Fair. The boys will be guests of the State Fair.

Award of the title of "Lone Star Farmer" for excellence in work will be bestowed on a number of the boys at the State Fair gathering. This is the highest title awarded by the organization. Revision of constitution and by-laws and election of new president to succeed Arthur Ellis, of New Waverly, resigned, will be included on the program. Decision on whether to hold annual state meeting at the State Fair will also be made. Among those invited to address the boys are Frank Briggs and Eugene Butler of Dallas and C. J. Davis, state supervisor of vocational agriculture, Austin.

The first chapter of the Future Farmers of Texas was organized in September, 1928. A total of 112 chapters over the state have been organized with membership of 6,040. State charter was granted Feb. 28, 1929. Purpose of the organization is the promotion and support of educational effort directed toward more efficient farming and livestock raising in Texas by the formation of local organizations of students of vocational agriculture in the public schools of the state.

Special Services First Methodist Closed Sunday

Dr. J. N. R. Score, pastor of St. Paul's Methodist Episcopal church of Houston, has returned to his home after closing a week's series of sermons at the First Methodist church here.

Many citizens from every religious denomination represented here heard Dr. Score during his stay in Bryan and express themselves as having greatly enjoyed his ability as a speaker and a minister.

15,937 BALES COTTON CROP HANDLED HERE

WAREHOUSES AND COMPRESS IN WEEKLY REPORT SHOW TOTALS TO DATE

Cotton received by Bryan warehouses to date is reported as follows: Farmers' Union, 6,230 bales; Lawrence, 1,652 bales; compress (exclusive of that received from other local warehouses) 7,350 bales; Eden, round bales, 1,350; square bales, 30.

Figuring round bales as half bales a total of 15,937 bales have been received here to date.

Alleged Forger Landed in Jail; Taken at Hearne

R. J. Arnold, who claims New Orleans as his home, was arrested in Hearne Saturday evening and brought to Bryan and landed in the county jail, charged with forging and issuing a check for \$27.

According to Sheriff J. H. Reed the man entered the store of J. Gelber and Son and made a few purchases and then presented a check, drawn in favor of J. C. Collins and purported to be signed by Carl Wiprecht. The check was accepted.

Later, suspicion as to the validity of the check were aroused by an examination of the Wiprecht signature and Mr. Wiprecht was called and stated that he had issued no such check. Police were notified and they discovered the man had gone to the city limits and boarded a bus bound for Hearne. Police there were notified and they picked Arnold up. The merchandise purchased and all but \$2 of the change received from the check were recovered. Arnold will be brought before Justice J. T. McGee today or tomorrow.

Borer Is Active In Large Number Over the State

COLLEGE STATION, Oct. 12.—The cotton square borer, one of the common insect enemies of cotton in Texas, is widely distributed within the state and is active in the field from March to November, bulletin by H. J. Reinhard, entomologist of the Experiment Station, A. and M. College of Texas, just issued by the station points out. Rearing records indicate that three complete generations or broods of this insect are produced during a season.

Usually multiplication of the cotton square borer is effectively checked by natural enemies, and combative measures to reduce infestations are rarely required. When control measures appear necessary, dry applications of calcium arsenate, five to seven pounds to an acre, are recommended, the bulletin points out. To be most effective, the poison should be applied when the majority of the caterpillars are in the early stages of development.

Serious Injury In Auto Crash For Bryan Boy

Joe P. Carnes was called to Palestine this morning by a telephone message stating that his 13-year-old son, A. C. Carnes, who has been employed in that city for the past several weeks as a truck driver, had been seriously injured in an automobile accident. The message stated that young Carnes had suffered a fractured skull, was unconscious and in a critical condition.

Mr. Carnes left immediately for Palestine. At 11 o'clock this morning Mr. Carnes telephoned McCulloch-Dansby ambulance company to meet the 2:50 train today at Hearne, as he was bringing his injured son back home to Bryan.

SUSPENDED SENTENCE GIVEN FOR THEFT OF AUTOMOBILE

William Nichols, charged with the theft of an automobile, was found guilty in district court Friday afternoon and given a five year suspended sentence.

Three cases against Huston Neeley, two of assault with intent to murder and one of driving a car while intoxicated, were continued until the next term of court on the motion of defendant's counsel.

BUYS BRAZOS CHICKENS

Mr. and Mrs. Devalson Buchanan of Sugarland were in Bryan yesterday. They came to Brazos county to purchase 1500 White Leghorn hens, with which to stock the Clayton Farms at Sugarland of which Mr. Buchanan is manager.

Daily Eagle want ads always bring results.

Success Is Won Thru Hard Work By Boy of Bryan

ROBERT HENRY HARRISON

If an example is needed to show what a man may accomplish thru hard work, turn to the story of Richard Henry "Chick" Harrison, '20. Announcements have just been received of the opening of his office as a physician and surgeon at 609 Medical Arts Building in Houston. Behind that announcement are years of work, starting back in 1916 when Harrison entered A. and M. from his Bryan home. After graduating from A. and M. with his degree in veterinary medicine he worked another four years, saving the money to finance his medical study. Today he is practicing.

Things did not come easy for Henry Harrison. He was not the quick and brilliant scholar who passed his courses with scarce an effort. Many hours of patient, painstaking, dogged study were necessary for his scholastic success. He was a candidate for the football team in the same way. His chance finally came on the gridiron and his letter was won. As a company captain in the cadet corps he was not a brilliant figure. Yet in the final test his company won the coveted Howell trophy as the best drilled company upon the campus, much to the surprise of his more scintillating competitors.

One of the most popular young ladies to attend the A. and M. dances in those days was Miss Merle Lucas of Waco. Surrounded always by the most dazzling of the cadet social leaders, it is doubtful if he gave second thought to "Chick" Harrison when he was first presented to her. Four years later found her Mrs. Harrison and today three year-old Richard Henry Harrison Jr. thrives in his home in Houston.

After his graduation in 1920 Harrison served the state as assistant veterinarian for four years. He entered Baylor University Medical School in Dallas in the fall of 1924, taking his M. D. degree from there in the spring of 1928. His internship was served in the Baptist Hospital at Houston where he was house doctor. During the past summer he completed a three-months course in the school of medical aviation at Brooks Field, Texas, and now holds a captain's rank in the U. S. Medical Reserve Corps, as well as being a certified flight surgeon in the Air Corps.

Looking back over the life of "Chick" Harrison since he entered A. and M. in 1916 one is struck with the fact that he has been successful in securing and winning what he started after. One by one he has made his goals. They have come only after hard work. Swift comrades have passed him and laughed, only to see him reach the finish line after they had faltered and failed. As a practicing physician and surgeon one of the great reached. He will have other ambitions, however, and the same traits that have won for him in the past will win for him in the future. —Texas Aggie.

Madison County Has no Citizen In State Prison

(By Associated Press) HOUSTON, Oct. 14.—If every county in the state were like Madison county the prison system would not need renovation because it would have no inmates, according to Representative Henry A. Turner of Madisonville.

Turner told the prison centralization commission at a meeting here that of Texas' prison population approximately 5,000, not one was from his county. Other members of the Madisonville delegation, which was seeking to have the proposed centralization plant located in or near their town, substantiated Turner's assertion.

WANT SANITARY SEWER

Residents of West 28th Street have petitioned the city commission for a sanitary sewer in their section. The petition, presented by Jack Johnson, was referred to a committee for decision.

Hiway Engineer On Committee to Raise Standards

J. E. Blair, division engineer for the state highway commission with headquarters in Bryan, returned from Austin last night where he spent four days as a member of the committee that is revising state highway commission road specifications and standards. Mr. Blair is one of two division engineers on the committee.

Some time ago the committee made a draft of changes which was sent out to many interested persons and firms for suggestion and comment. This week many engineers, material men and others were heard and the returns on the changes sent out checked. It is expected another meeting will be held in a month or six weeks when a final draft of specifications and standards will be made that will bring Texas up on a par with those states which are making most progress in good roads building.

Speaking of the improvement of Highways Nos. 6 and 21, approved by the people of the county last month, Mr. Blair said that he expected a contract would be let for the improvement of No. 6 from Bryan to Benches at the first of the year. At the same time, he said, a survey of No. 21 likely would be ordered.

This survey, according to Mr. Blair, will take considerable time. Borings and other investigations and tests will be made to determine the best locations for the bridges across the Big and Little Brazos rivers, especially for the Big Brazos structure.

Women of Kurten Organize P-T.A. Friday Afternoon

The Kurten Parent-Teachers Association was organized Friday afternoon with a charter membership of seventeen and the following officers: Mrs. James Lang, president; Mrs. W. T. Henderson, first vice president and chairman of program; Mrs. Henry Kurten, second vice president and chairman of membership; Mrs. W. F. Odum, third vice president and chairman of finance; Mrs. W. R. Lawless, secretary-treasurer. Meetings will be held on the first Thursday afternoon at 3:00 each month.

The membership roll of the Kurten P-T.A. includes Mesdames James Lang, W. T. Henderson, Henry Kurten, W. F. Odum, W. R. Lawless, W. T. Kelly, Seab Keith, John Sabo, J. P. Gilpin, Joe Yeager, C. C. Kintworth, Oscar Kurten, L. C. Gerke, M. B. Easters, Misses Ruby Wallin, Myrtle Williams and W. D. Bunting.

The Brazos County P-T.A. Council was represented by Mrs. E. J. Reese, vice president, and Mrs. Albert Buchanan, chairman of publicity, Ninth District P-T.A., and president of the Bryan P-T.A. Council.

Two Long Passes Get Touchdowns For Bryan Team

Although defeated by the heavy Beaumont high school eleven Saturday, the Bryan high school team made itself felt, especially in the last quarter when two touchdowns were scored by means of long passes and runs. The final score was 31 to 13.

The locals were so outwitted that they were unable to gain thru the line and depended almost entirely on an aerial game. In the second and third quarters they worked the ball deep into Beaumont territory a number of times by the passing game, but were not able to carry it across.

The two touchdowns in the fourth quarter both came on passes of about 40 yards to Joe Merka from Womble, both of them being caught back of the Beaumont secondary defense, and then Merka ran about 50 yards on each for the touchdown. The extra point was made on the second by Deason going through the line.

Three of the Bryan players will be out of the Port Arthur game Friday, on account of injuries suffered Saturday. McDougald, end, has a badly strained wrist; Deason, quarter and captain, has a shoulder that will keep him out for two or three weeks, and Gomez, center, has a sprained ankle.

Womble, who went in at quarter after Deason was taken out, played a star game, as did Deason until he was hurt. Joe Merka at end was a star and Gomez at center was exceptionally good on defense.

LOCAL COUPLE MARRIED

The marriage of Miss Artie Lou Smith and Theodore Thomsen, both of Bryan, was solemnized this morning at ten o'clock at the First Baptist church of this city, with the pastor, Rev. E. Day, officiating. A full account of the marriage will appear in the society columns of The Eagle.

Forrest Field To Be Dedicated On Next Friday

Plans are being made for the dedication next Friday afternoon at 2:45 o'clock of Forrest Field, the new athletic arena of Stephen F. Austin high school. The occasion will be marked by a clash between the famous Yellow-Jackets of Port Arthur, the team that battled Abilene last season for state honors and which was defeated Saturday by Allen Academy.

The master of ceremonies for the day will be the president of the senior class, John M. Barron. The presentation speech will be made by W. S. Howell, president of the Athletic Council which has made the field possible. An address of appreciation will be made by Mayor E. J. Jenkins and Supt. H. L. Durham will accept the field on behalf of the student body and F. L. Henderson, president of the board of school trustees, will accept for that body.

Arrangements are in the making to have the Allen Academy band furnish the music for the occasion and the girls "pep" squad also will have a part in the ceremonies. Just as the local high school team comes on the field it is planned to have the Allen band play the high school song.

The day promises to be one of the most interesting in the history of high school athletics and the game to be one of the best scheduled for this season. Bryan high showed up well against Beaumont and is expected to make a good showing, even if it does not win, against the strong Port Arthur high organization.

TRUCK BIDS RECEIVED

Bids for two new trucks, one for trash hauling and the other for the water department, were tabulated by the city commission last night. The matter of purchase, however, was referred to a committee for further investigation before any decision is made.

DANCE IS ENJOYED

Members of the Young Peoples Service League of St. Andrew's Episcopal church including some 20 young ladies of Bryan and cadets of the Episcopal group at A. and M. College enjoyed a dance at the Elk's Club room on Saturday night. Chaperones for the occasion were Mesdames W. W. Daup, T. K. Lawrence and George Chance.

How They Got It

The suitcases were not coming from the male electorate by agitation and violence. It was admitted—perhaps "shared" would be a better word; but of well earned appreciation and respect.

Rainbow Girls Guests Of Mr. and Mrs. Brown

Members of Bryan Assembly No. 41, Order of the Rainbow for girls who attended last night's meeting, were guests of Rev. and Mrs. R. L. Brown at a local confectionary following the close of the business session.

The new corps of officers installed at the last meeting in September filled their stations with credit, with Miss Elizabeth Sloop presiding as Worthy Advisor.

CHANGE TIME FOR MEETING

Taking cognizance of the fall season, the city commission last night fixed the time for all future meetings held in the evening, at 7:30 p. m. During the spring and summer the meetings were held at 8 o'clock.

COTTON RECEIPTS SHORT

Joe F. Howard, official statistician, reports the receipt of cotton at this time as follows: October 1, 1929, 7,856 bales, compared to 19,146 bales received up to October 1, 1928.

Illness Is Fatal To Clary Infant

Friends of Mr. and Mrs. J. M. Clary sympathize with them in the death of their 2 year old baby son, Dan Eugene Clary, who passed away at the family home in the Leonard school community, this morning at 11 o'clock after an illness of only one day's duration. The parents, one sister and one brother survive.

The body will be taken overland to Cross, Grimes county, for interment Tuesday morning in the Cross cemetery. Rev. C. B. Thompson, pastor of the Free Baptist church of North Zulch will conduct the services and McCulloch-Dansby funeral directors of Bryan will be in charge of all arrangements.

Brazos Club Boys Off for Big Fair

The following club boys, together with County Agent C. L. Beason left for the Dallas Fair today: Willie Yeager of Kurten, Elmer Wilson of Taylor and Elmer Murray of Steep Hollow. They will Friday.

Heads Brazos Aggies

T. A. MUNSON

Professor of railroad engineering at A. & M. College elected president of the Brazos County A. and M. Ex-Students' Club.

Alumni of A. & M. In Brazos County Elect Officers

COLLEGE STATION, Oct. 17.—T. A. Munson, professor of railroad engineering at the A. and M. College of Texas was elected president, and H. C. Dillman, vice-president, and L. G. Jones, secretary-treasurer, of the Brazos County A. and M. Ex-Students' Club at recent meeting of the club held at the college. Directors elected for the ensuing year are Fred Hale, Mit Dansby, C. H. Winkler, H. H. Williamson, and M. T. Harrington.

Starting the year off with no debts hanging over their heads, members of the club are optimistic regarding successful carrying out of the year's program. Plans are being made for a reception in honor of all former students who will be on the campus at Thanksgiving season, when the Texas Aggies meet the University of Texas Longhorns on Kyle Field. The annual barbecue for former students given at commencement will be sponsored again this year by the club, according to the secretary. Meetings of the club will be held once a month, with an occasional invitation extended to wives and friends.

Normangee Boy Has Leg Broken in Football Game

Homer Shirley, sustained a broken leg in the football game last Friday afternoon. "It was in the middle of the second quarter that the accident occurred. The right leg was broken just above the knee. Homer is 17 years of age, and in the senior class. He received medical attention here, and next day was taken to Bryan where an x-ray showed the condition of the break. It has caused him much pain, but it is hoped that he will be able to be up again without being seriously crippled.—Normangee Star.

Golden Rule Pen Wins High Honor In Egg Contest

(Special to The Eagle)

COLLEGE STATION, Oct. 12.—The Golden Rule Poultry Farm, Bryan, carried off honors for highest contest pen for the month, and to date and highest contest individual for the month during September, the eleventh month of the twelfth Texas National Egg-Laying Contest at the A. and M. College of Texas, report for the month shows. The Marshall Farms, Mobile, Ala., took honors for highest contest individual to date.

The report shows total of 233 eggs for the Golden Rule Poultry Farm's pen for the month, 2601 eggs for that entry's pen to date and 26 eggs for the same entry's winning individual bird for the month. The Marshall Farms entry is credited with 297 eggs as highest individual bird to date. For seven consecutive months the Golden Rule Farm pen of White Leghorns has won monthly pen honors.

LITTLEST MAID OF HONOR AT BRYAN GIRLS' NUPTIAL

The approaching marriage of Miss Nanne Shel Waldrop of Bryan and Mr. Charles F. Howard of West Virginia, to be solemnized in this city during the month of November, is mentioned in the Waco News-Tribune today in the following:

The littlest maid of honor on record will be Miss Nancy Willis, daughter of Mr. and Mrs. J. D. Willis on Austin avenue, when she attends her cousin, Miss Nanne Shel Waldrop, of Bryan, who will become the bride of C. F. Howard at Bryan in November.

Daily Eagle want ads always bring results.

SON CULTURE IS STUDY FOR KURTEN CLASS

TO MEET WEEKLY IN COURSE FOR IMPROVEMENT OF FARM LANDS

Thirteen farmers and six farm boys of the Kurten community met at the Kurten school building Thursday night and organized for an evening class to discuss soil improvement in their community.

W. E. Leverkuhn, vocational agriculture teacher in the Bryan schools, will have charge of the course and conduct the meetings at which the problems of terracing, crop rotation, and use of fertilizers will be considered and will be worked out to apply to the farmers in the Kurten community. The meetings will be held on Wednesday night of each week until the problems are thoroughly worked out, and will begin at 7:30 and end promptly at 9:00 or before, in case the work is covered in less time.

The farmers present Thursday evening expressed themselves as interested in improving their farms by bettering the soil and then using better bred livestock to hold the fertility up for the profitable production of crops. Other farmers of the community and surrounding communities are invited to attend the meetings and get in line. Those attending the meeting will be taught how to terrace land and improve their farms by actually getting out and putting into practice the remedies decided upon in the discussions.

David Bunting, principal of the Kurten school, is taking an active part in helping to put over the meetings.

Bryan Auxiliary Am. Legion Will Install Officers

The American Legion Auxiliary of Bryan will hold a public installation of the newly elected officers of the organization on Friday afternoon at 3:30 o'clock in the ball room of the LaSalle Hotel in this city. Mrs. Harry Estill, chairman of District Six of the state organization, will act as the installing officer.

Officers to be installed are president, Mrs. I. H. Bartz; vice president, Mrs. Harry Estill; secretary-treasurer, Mrs. Lute Peterson; reporter, Mrs. Harry St. Edge; chaplain, Mrs. Jesse Thomson; sergeant-at-arms, Mrs. Joe Sosoloff. Following the installation service, Mrs. Lucy Givens, county home demonstration agent, and who is assisting in plans for the American Legion Fair, Oct. 31 to Nov. 2, will announce plans whereby the members of the American Legion Auxiliary will be able to be of most help to the fair and render the best service in making it a success.

The program for the day will then follow and will include the following:

"Ideals and Principles of the American Legion Auxiliary," Mrs. Jesse G. Thompson.
"Early History of Auxiliary," Mrs. William Owens.
"History of Earl Graham Unit," Mrs. Old Martensen.
"Our Problems—Rehabilitation, Child Welfare, Americanism," Mrs. A. H. Swain.
"American Legion Auxiliary and United Daughters of the Confederacy as Sister Organizations," Mrs. Albert Buchanan.
Closing song, "America."

Musicians Called By Tabernacle of Baptists in Waco

Mr. and Mrs. Claude H. Ward, formerly of First Baptist Church, Galveston, but now singing with Tabernacle Baptist tent revival each night until Nov. 3, will remain in Waco, Mr. Ward has been unanimously called by Tabernacle Baptist church Sunday as Sunday School superintendent, financial secretary and music director.

Mr. and Mrs. Ward are gifted musicians, having been trained and graduated from the Shenandoah Conservatory of Music and the New England Conservatory of Music Boston, and both render parts in extended concert work. Mr. Ward as dramatic tenor and director, Mrs. Ward as dramatic soprano soloist and accompanist.

Since coming from West Virginia to Texas in 1923 the Wards have been associated with First Church of Christ, Bryan, Mexico and Galveston and friends over the South and follow their career with interest. The Wards are regarded a distinct asset to Waco music life.

City Commissioners H. A. Burger and Forrest Jones, accompanied by City Manager J. Bryan Miller, left for Houston this morning to look over trucks. The city proposes to buy a new truck and also plans for the water department.

RIGHT-OF-WAY IS TO BE GIVEN BY RESIDENTS

Will Start To Move Fences In Short Time

ROADWAY OF 80 FEET

Decided At Squirrel Stew Supper Held Last Night

Residents of the Harvey community met last night with County Judge A. S. McSwain and Commissioner Guy F. Boyett at an old fashioned squirrel stew for the purpose of planning the lateral road improvement of that district.

A fine feeling toward the improvement was manifested by the more than 100 residents present and they agreed without hesitation to give land for right of way in order that the road may have a minimum width of 80 feet and be straightened as much as possible and to move fences back. This work will be done by the residents themselves, in order that the road may be ready for grading by Commissioner Boyett without the expenditure of any of the \$16,000 which was allotted for this improvement in the division of the \$250,000 which was set aside for lateral road improvement when the \$1,100,000 bond issue was planned.

The spirit of the community toward road improvement was reflected when an advisory committee to cooperate with the county commissioners court was elected at the meeting. The men chosen are N. C. Cole, E. U. Peters and Lee Andrews. These men will serve to keep a contact between the residents and the county officials and to advise with them and aid them in every possible way to the end that the Bryan-Harvey road be the best possible.

Skilled hunters furnished squirrels in abundance for the savory stew, which Judge McSwain says was the best ever, and the women of the community furnished cakes, pies, ice tea and other good things to top off the supper.

Smetana Exhibit For County Fair Given Approval

Residents of the Smetana school district gave hearty approval to the plan of a community exhibit, to be made at the Brazos County Fair Oct. 31, Nov. 1 and 2, and arrangements were made to get in touch with all homes in order that the best possible collection and arrangement of products of the farm and farm home be made.

The meeting was arranged by Britton Henderson, principal of the Smetana school, and C. L. Beason, county agent. Called to order by Mr. Henderson the meeting was turned over to Mr. Beason who discussed the sort of exhibits desired and the premium list in detail. He urged the wisdom of making a community exhibit, in addition to any individual exhibits that residents of the community might decide to make.

S. E. Eberstadt, secretary and general manager of the fair, which will be held in the Oak Grove addition, discussed the fair from various points of view, showing what arrangements were to be made for caring for exhibits handling the crowds expected and the amusements to be provided.

As a result of the interest shown Mrs. H. P. Franklin was named general chairman to put over the project of a community exhibit. Mrs. Franklin will name a committee to visit all homes and another to plan decorations and arrangement of exhibits. All exhibits to be entered must be taken to the Smetana school house Monday, Oct. 28, where they will be judged and the best brought to the fair the next day.

Fall Breaks Arm; Bryan Woman Is Injured Sunday

The many friends of Mrs. S. H. Brockman will regret to learn of her injury sustained when she fell at the home of her daughter, Mrs. T. R. Black on Sunday and broke her right arm.

Mrs. Brockman is recovering from a stroke of paralysis suffered recently and in attempting to walk from the porch to her room lost her footing and fell in such a way as to fracture her right arm in two places, one above and one below the elbow.

Mrs. Brockman is now confined to her bed at the home of her daughter, Mrs. Locke McNeely on Mechanics Avenue, and is suffering severely from her injury.

Her Majesty The Modern Woman

IT'S a far cry back hundreds of years ago when woman was considered a chattel and endured the hardships of slavery and serfdom. Nor is there a more encouraging development for the future welfare of humanity than the continual evolution and development of woman. Through the ages we have heard of Woman's Sphere, and, with the passing of the years, this sphere has been a constantly enlarging one until today the Woman's Sphere practically encompasses the entire realm of activities that were formerly to be found only in the man's world.

Her majesty, the modern woman, stands on a basis of equality with man and is found in the front ranks as the leader in some of our most progressive movements. She is the mainstay of the three greatest factors in community life: the Home, the Church and the School. While man is still the major breadwinner, yet one-fifth of all persons, gainfully occupied, are girls and women. So well have they served modern industry, business and professional life could ill afford to do without them.

The greatest contribution that woman makes to America and to the community is in her role as wife and mother. She cares for the children, keeping constant watch over them and guiding them through their infancy and adolescence. She keeps the home, that great sanctuary of American life, and fosters the best interests of family life. Woman has much more to do with the Standard of living in the Home and for the family than does the man.

Although men are in the majority as wage earners, two-thirds of the family income is spent by women.

These expenditures are made in practically every field of activity. Today she is the chief customer of business. For example, women buy 78% of the pianos; 49% of men's socks; 81% of the groceries; 82% of department store merchandise; 98% of the silks; 78% of the drugs, 80% of the jewelry. An odd list, picked at random, but typical of the important part played by women in our modern world.

By intelligent and careful expenditure, women are making a vast contribution to the furthering of thrift and saving in American life—and to them we look for the upholding of the Community Ideals

An Unusual Son

An unusual case of a son's respect for the expressed wishes of a father is found in the case of Dr. Arthur A. Mitten, son of the late Thomas E. Mitten, one of the most widely known men in the world of urban transportation systems. Dr. Mitten has refused to accept some \$10,000,000, left by his father for the purpose of establishing a foundation for the promotion of better relations between capital and labor, which is legally his by a technicality of the Pennsylvania law.

But the son, although the will dividing most of the Mitten fortune to this foundation was written but six days before the death of the transportation specialist, has seen fit to permit the will to stand, the fortune to be used as his father desired.

This is unusual in this day and generation—probably unusual in the whole history of devised money and property. Frequently children and other heirs seek to break wills that are not in accord with what they think they should be and it is seldom that children are willing that large fortunes be left away from them and make no effort to retain them for their own uses when this is legally possible.

It is of interest, too, that the son sees the problem of greater good feeling and understanding between capital and labor with his father's eyes. The elder Mitten, starting as a poor boy, learned the art of telegraphy and after serving in various positions with railroads of the country, entered the urban street railway field. When he died a few days ago he was chairman of the board of the Philadelphia Rapid Transit system and much of his success in the administration of that system was due to his ability to handle the labor problem successfully.

That there is need for more work along this line, no one familiar with the relations of capital and labor will doubt. There has been a vast improvement in this relationship but there still is much to do before there exists that understanding which will make for greater accomplishment and prosperity for both the employer and the employee. This is an age of many foundations but none can serve better than the one established by the older Mitten and the action of the son in insisting that his father's wishes be carried out in this work should lend it a spirit making it even more valuable than otherwise would be the case.

Harvey Steps Out

An example has been set by the residents of the Harvey community in the matter of planning for lateral road improvement that will result in a great road development in the county if it is followed by other communities that share in the \$250,000 which has been voted for lateral road improvement.

The residents of Harvey, gathered together around a festival board heavily laden with good things to eat, decided they wanted the best possible road the \$16,000 allotted to them would build. To this end they decided to give what land would be necessary to make a roadway at least 80 feet wide and to straighten it out as much as possible. The work of moving back the fences where this is necessary will be started at once. Everything that can be done to improve the road and to put it in shape for the final grading and finishing will be done by the residents in order that the \$16,000 may go just as far as possible in the making of an all weather road between Harvey and Bryan.

The residents of that section were not in favor of the bond issue. Harvey was one of three communities in the county that voted against it. But now that the majority of the citizens who voted favor this improvement the residents of Harvey not only are making the best of it but they are intent on having the best possible road that the money allotted to them will buy. The residents of the community discussed the proposition openly and frankly with county officials and made it plain that they propose to cooperate to the limit in this scheme of community betterment and improvement. What community will be next?

Down in Mexico, where President Portes Gil has done much to wean his people from indulgence in alcoholic drinks and stimulants, some 15,000 school children will repeat the anti-alcoholic oath on the occasion of the dedication of a new athletic field for the youth of Mexico City. This would appear to be the right sort of educational work in the cause of prohibition. If the youth of Mexico or of any other country can be sold the idea that alcohol and physical or mental prowess do not go together, and every youth is ambitious in one direction or the other, if not in both, then a long step will be taken toward guarding them against the evils of intemperance in later days. Similar steps might be taken in this country with benefit to the youth of the land and to society in general.

The announcement of the appointment of former Governor Pat M. Neff as chairman of the state railroad commission, to succeed the late Clarence E. Gilmore, is one that should be well received by the people of Texas and by the railroads doing business in this state, and Governor Moody is to be congratulated on the wisdom of his appointment. The former governor is well qualified for the position and none will question his integrity or his desire to administer any public office for the best interest of the whole citizenship of the state.

Meetings will be held this week in four rural communities at which county officials and residents of the respective communities will discuss lateral road improvement. To make the most of the money that is to be invested there must be cooperation all along the line. Harvey set a good example in this particular and if the other communities do as well this county will get a wonderful return for the investment of \$250,000.

The moonlight strolls that intrigued the swains and sweethearts of a former generation would be fraught with danger in Bryan and there is no wonder they take to the automobile, dangerous as one handed driving may be. We lack the sidewalks to make such diversions a pleasure.

BRYAN TOTS SCORE PHYSICALLY PERFECT

ALICE SUE ROMAN

Physical examinations conducted under the auspices of local Parent-Teacher organizations for children entering the first grade in Bryan schools this year revealed two tots who scored according to a standardized scale of weights and measures, registered no uncorrected defects of vision, hearing, throat or other organs and who had met the requirements of the National Parent-Teacher Association in the matter of inoculation for diphtheria and vaccination for smallpox.

These children, Alice Sue Roman, daughter of Mr. and Mrs. W. B. Roman and Olive Mabry Griner, daughter of Capt. and Mrs. George W. Griner, both entered the first grade at Travis school this year.

Alice Sue Roman had her examination during the spring round up conducted in June under the direction of Mrs. N. L. McCullough and Mrs. Hal Halkom, chairmen of the child hygiene committee, for the Travis and Bowie Parent-Teacher clubs. Her score was perfect at the time of the first examination.

Olive Mabry Griner had her first examination at Mount Pleasant, S. C., where her parents were residing last spring and registered a perfect score except for the administration of diphtheria toxin-antitoxin. This treatment was received before the second roundup was conducted in the autumn and gave her a perfect score as a

OLIVE MABRY GRINER

result of the second examination received in Bryan after Capt. and Mrs. Griner came to make their home here.

The summer roundup campaigns initiated by the National Parent-Teacher Association some years ago, have as an objective the discovery of physical defects existing in children who will enter the first grade in the fall in time to allow their correction before the opening days of school.

To accomplish this, a preliminary clinic is conducted early in the summer to which mothers of prospective first graders are invited to bring their children for examination. Defects are recorded and reported to the parents so that they may consult with physicians and have corrections attended to before the child enters school.

In this way many cases of defective vision, ear trouble, throat affections and other defects that would retard the progress of children in school, are brought to the attention of parents and the welfare of individual children is frequently promoted as well as the general progress of the school, since students that are physically subnormal retard the progress of an entire grade.

Local Parent-Teacher organizations have been conducting summer round-ups regularly for some years with very appreciable results in the per cent of corrections secured among the children examined.

Parade on Main
By Austin High
Before Big Game

High School students of Stephen F. Austin, led by the Allen Academy band, will parade Main Street next Friday afternoon just before the dedication of Forrester Field and the game with the Yellow Jackets, the strong Port Arthur high school eleven which scored two touchdowns last Saturday against Allen Academy team.

The girls of the "Pep" squad will invade the business section of the city Thursday for the sale of tickets to the game and it is expected that the largest crowd of the season will be out for the dedication ceremonies and the game.

At a meeting this morning of the Athletic Council the statement was made that the finances of the organization were in fair condition, but that the game Friday should produce a good revenue in order to break even on account of the big guarantee to Port Arthur. Spectators at the game Friday

will have an opportunity to see in Dumesnil, halfback for Port Arthur, one of the outstanding backfield high school players in the state. He played a stellar game against Allen and is expected to be a big attraction Friday.

Coach Spratt is drilling his men against the Port Arthur attack as he profited by observations made in the game with Allen. It is not expected that Deason will be able to play, but the other men of the first string, it is believed, will be in shape to play part of the game.

MOODY MAKES NEW RECORD
IN APPOINTING ELECTIVES

(By Associated Press)
AUSTIN, Oct. 16.—Governor Moody holds a record in being called as an chief executive to name three elective officers within six weeks. Death caused the removal of two and one resigned.

Gov. Moody was obliged to appoint successors to the late J. T. Robison, commissioner of the general land office, and Clarence E. Gilmore, chairman of the railroad commission, both of whom died in office, and Attorney General Claude Pollard, who resigned to enter private practice of law.

YOU ARE JUST AS "BIG" AS YOU THINK AND DO
There is only one obstacle to the progress of any community that is definitely fatal, and that is lack of civic spirit and team work on the part of its citizens.

A few years ago a small town was in the sticks; today the only towns or communities in the sticks are those made up of sticks and a "stick" is one who refuses to do anything himself or get together with those who will.

A town is just as big as the people in it. The trouble is that it is easier to be little than big, and nature, left alone, does not improve without aid.

A big job requires big people, and in this day of keen competition, "putting your town over" is no little undertaking, and if there is an over abundance of "little" people in any community, it won't be done. "Little" people are those who say it can't be done. "Big" people are those who interrupt those who say it can't be done, by doing it.

Thinking Bryan is the best place on earth isn't enough. It helps, but thinking so doesn't make it so, unless you follow up thinking with doing.

You say, "I think Bryan should do this;" or "We should have that." You read these editorials and say, "That's a good idea," or "I think that's right," etc. etc., but what do you do about it?

As you read this, you say, "I hope so-and-so sees this. It hits him right on the head, he is always talking a lot, but never does anything," and you may be right, but how about yourself? Maybe you don't even talk, and when you do talk, do you talk your town "up" or "down"? If you are big, you will talk it up, otherwise, you will say to yourself, "Oh, let the Chamber of Commerce, the Lions club, or somebody else do it."

To be "big" you do not have to be a merchant, a doctor, a lawyer or a banker. You think you are little potatoes, you will be little potatoes. No matter who you are or what you do, you are just as big as you think and do.

This Town Doctor Article is published by The Bryan Eagle in cooperation with the Bryan Lions Club.

Twenty-Five Years
Ago

(Taken from the files of The Bryan Morning Eagle, October 16, 1904, twenty-five years ago.)

Wives are still bought and sold in the Volga. Pretty girls from well to do families bring the equivalent of \$100 to \$200, village maidens are worth about \$25. If a young farmer's father cannot afford to buy him a wife, he just need not think about marriage.

The A. and M. football team will play Baylor University on Saturday.

Horses and saddles with which to mount Allen Academy students for the street parade on the opening day of the fair are needed. Anyone who could supply one or more mounts please notify Prof. J. H. Allen.

"The wise man shapes himself according to circumstances as water takes the shape of the vessel into which it is poured.—Japanese proverb.

Miss Edna Zuber is visiting in Mumford.

Miss Elizabeth Weedon is visiting in Austin.

Prof. J. T. McGee of Tabor was in town yesterday.

Miss Robbie Seale of Benchley has returned from a visit to relatives at Baird.

The electric light service now being given to the people of Bryan is the subject of much complaint.

Prof. D. J. McDonald of Kurten was in town yesterday and expressed his intention of being here on the opening day of the fair to hear Gov. Hogg's address.

Mrs. Lillie Chance, Master Denden Chance and Miss Frances left yesterday for Hillsboro and Corsicana.

The postal deficiency for the past year was \$8,779,482.

Parties around Wallisville are preparing to ship 6,000 head of cattle to Cuba.

I was much interested in reading in the Rangoon, Burma, India. Times an address made by His Excellency, Sir Charles Innis, Governor of Burma, to graduates of the University of Rangoon. In part the Governor said:

"Once you have been taught to think, you gain experience. You have a chance of becoming what is known as a man of good judgment. Also you become more and more considerate of the opinions and mistakes of others, for you find out for yourselves how difficult it is to acquire a right judgment in all things.

"We in the Government are accustomed to criticism. Indeed, every day of my life my chief secretary puts up to me the criticisms of the Government in Burma, and I read them with due attention and such philosophy as I may. Some of them are valuable; some insincere, at least they seem to be so to me, and some again are a mere repetition of current political catchwords which in other countries, as well as Burma, are apt to take the trend of political thought.

"Criticism as such as you like, but at least let your criticism be fair, informed and thoughtful."

Much can be gained if we would stop and think more before we speak. We are all too prone to criticize our state and national governments with careless words and without full knowledge of what we say. It is always best to help make our government better. If we have to criticize, well thought out, constructive criticism is best.

EXIT PRESS AGENTS

Perhaps no profession in the world, if it indeed is a profession, is in such ill repute at this time as that of the "public relations managers"—in other words the "press agent."

Last year we learned how paper and power interests were even buying great newspapers in their efforts to control public opinion. We found that power companies had their press agents "sit in" on the copy desk of large newspapers, how the smaller newspapers were the prey of the "free editorial" writers of the country.

Now we find that the press agent is in the diplomatic service, for the now famous William B. Shearer says his propaganda even broke up a costly naval disarmament conference. He was there to see that the big ship builders continued to hold their jobs, even though expensive for the people of the world.

Now lobbying in general is being investigated in Washington, and perhaps the day will come when these "public relations experts" will be a discredited group, and will cease to attempt to sway public opinion for the private gain of some corporation or individual.

The job of the editor now-a-days is more in what he keeps out of a newspaper than in what he

puts in. Every day hundreds of letters come to the desk of every editor—letters that are seeking free advertising space for some organization, business or individual.

Most editors have learned the envelope and the public relations "copy" goes to the wastebasket unopened. The radio is perhaps the worst offender, with the automobile maker, fraternal orders, insurance companies, oil companies, and various and sundry associations wasting their share to get in free.

Manufacturers spend their millions for their radio "hour" and then ask the newspaper to tell about it free. Others argue that since they spend 50 cents they should have \$1 worth of space free.

Investigations are opening the eyes of the statesmen as well as the newspaper editors. Perhaps a stricter code of ethics for the journalist may result from the exposure of these propagandists.—Mexico News.

STEP RIGHT UP AND JOIN

Of course there are plenty of societies and associations now, and lobbying is not so popular, but somebody should start the "Society for the Prevention of Holidays," for it would find popular favor among all business men who suddenly discover that they have no provision for change and the banks are closed for somebody's birthday or something.

Every time a congressman makes a speech lauding the deeds of some noble forefather, a new resolution is produced for another holiday. It seems the members of congress know no other way to honor a great character of history but to handicap business by closing the postoffices and the banks for one day a year.

If this country continues its holiday making pace we'll have all holidays some day.

Of course Columbus was a smart sea captain. He discovered a great country. He is due to have all the honor that is coming to him, but there is no reason to close the banks just because Columbus happened to discover America on Oct. 12. It would be better to make it a great trading day; just to honor him. Instead of closing the banks for Columbus day, why not keep them open an extra hour in his honor.

Christmas, the Fourth of July and Thanksgiving, with perhaps a day off for Armistice Day, would be plenty of holidays. Us working boys don't get the day off, anyway, and bankers have plenty of time off every day.—Mexico News.

Temple Telegram
Sold to Mayburn;
In Charge Nov. 1

TEMPLE, Oct. 16.—Announcement was made here Tuesday afternoon of the purchase by Ward C. Mayborn and his three sons of the Temple Daily and Sunday Telegram from the Telegram Publishing Company, Inc., publishers. E. K. Williams is president of the publishing company and has been general manager of the Temple papers for some years. No announcement of the price paid for the newspaper property was made but it is understood that this was a \$350,000 deal.

Mr. Mayborn is one of the best known newspapermen in Texas. His home for a number of years was in Fort Worth, but some years ago he went to Houston as business manager of the Houston Press, Scripps-Howard newspaper. He resigned this position last June.

It is understood that E. K. Williams, who was president and possibly the largest stockholder of the Telegram Publishing Company, will devote his time to his private interests, which lie largely in aviation.

The new owners will take charge of the paper on Nov. 1. Mr. Mayborn announced that he and his sons would continue publication of the newspaper under the same policy as it is now published, and that probably few changes in the staff personnel would be made. His oldest son, Frank Maybourn, will join him on Nov. 1 in the management of the publication. His other sons, Don, now a student at the University of Pennsylvania, and Theodore, a student at the University of Texas, will become associated in the control of the paper as soon as they finish school, Mr. Mayborn said.

Charles W. Ingram is managing editor of the Telegram and J. Lee West is advertising manager.

CHINESE STUDENTS PLAN
FLYING SCHOOL IN CHINA

SAN ANTONIO, Oct. 16.—Nai Kwan Wang, mechanical engineering student, and C. M. Hu, natives of China, will enter the primary flying school at Brooks Field. After completing the course they plan to return to China, where they will start a military flying school.

Wang is a graduate of the Nan Kai University in Tientsin, China. He also has completed a course in mechanical engineering at the Ford Institute of Technology at Detroit.

Daily Eagle want ads always bring results.

THE LINDBERGHs IN PANAMA

Colonel and Mrs. Charles Lindbergh are shown with President F. H. Arosemena and Mrs. Arosemena, who were their hosts when they stopped in Panama. The flying colonel and his wife are exploring ancient Mayan ruins in Central America and southern Mexico.

Survey of Texas Shows Big Growth
In State as Result of "Cow, Sow,
Hen" Program; Dairying in Lead

BY NELL BENTLEY

That the objective of the old "cow, sow, hen" campaign in vogue a few years ago is finding fruition in Texas, is evident from data secured by a survey to determine how many counties in the state showed an increase in beef cattle, hogs, dairying and poultry raising during the past twelve months. While the information obtained was not detailed as to the percent of increase over previous years, it was ascertained that beef cattle had increased in number in 59 counties; hogs, in 43 counties; dairying and dairy products in 95 counties and poultry and poultry products in 72 counties.

While dairying, according to information gathered, shows the largest increase in popularity and reports showed every section of the state in the process of development along dairy lines; the general increase in beef cattle raising, hog raising and poultry raising is clearly an index to the trend of agricultural development from a statewide viewpoint.

The humble American hen has to her credit some billion dollars worth of business created during the past year and collectively she is producing about 760 eggs a second. It is estimated that 2,000,000,000 dozen eggs were produced in the United States last year and poultry production now stands third from a national standpoint as a branch of the livestock industry. The canning of poultry meat for market has opened a new field of production and profit to poultry growers and many families would be glad to use more poultry on their tables if they grew their own or had daily access to a dependable buying source.

The rate of increase in consumption of dairy products in the United States during the past ten years has probably been greater than for any other staple food product. The popularity of whole milk, cottage cheese, ice cream and butter has been increased materially by health diet programs and propaganda as well as regulated sales which have fixed a high standard of cleanliness and quality in products placed on the market.

In 1914, there were no cheese factories in the South as recognized by the U. S. Department of Agriculture. In 1915, two small co-operative factories were put into operation in a mountain section of North Carolina, manufacturing during the year some 15,000 pounds of cheese valued at \$3,000. The next five years brought numbers of small co-operative cheese factories to the South although the volume of milk production increased slowly.

In 1927, one of the leading cheese manufacturing concerns of the United States located a factory in Mississippi. It proved successful and the cheese industry has expanded in the South during the past two years to include 63 factories. A belief prevalent some years ago that cheese could not be manufactured satisfactorily in the South has been dispelled and in 1928 the South manufactured 6,000,000 pounds of cheese valued at millions of dollars and the U. S. Department of Agriculture anticipates that cheese making will become an established industry here.

A revival of hog-calling contests during county fairs and other farm educational events would indicate that the lowly porker is staging a comeback in the agricultural renaissance of the South. Plenty of home cured ham and brown gravy might be assured to every southern farm family with but a careful investment and a bit of careful planning combined with daily feed and attention. Home grown feed can usually be fed to first class porkers with profit if balanced off according to feeding schedules that have been worked out by experts and which do away largely with the old guess work methods of a few years back.

Producing cream for market was one day merely a matter of turning the excess from the farm table

supply into pin money. Usually the women and girls around the farm home were responsible for picking up that bit of extra cash. Today the production and sale of cream has become a business worthy of the time, attention and interest of real business men and farm women become business women in the management of the home dairy and the sale of its output.

On certain cream routes in Jones county recently a check was made and it was found that selling cream on a sweet cream basis increased the amount received for 2,171 pounds of butter fat by \$238.81 cents over what would have been received on a sour cream basis. This was an average of \$5 additional to each patron on the route checked during the month of September.

Only 6 years ago, the bulk of the butter produced in Minnesota was being marketed in 3 cities. In order to widen the scope of their market field and make profitable an ever increasing volume of production, butter makers and manufacturers of that state began to grade their butter and subject it to federal inspection. As a result, Minnesota butter is selling in 65 of the largest cities of the United States today and at the top market price.

There has never been a time in the history of Texas when livestock did not furnish the source of much wealth and income, yet the dairy industry and poultry raising on a commercial scale are comparatively new in the list of occupations followed by its citizens. In sections of the state where cotton has been the predominant crop, it is evident that any program of farming which reduces the acreage planted to cotton and increases the acreage devoted to feed crops, must include some phase or phases of livestock raising if the changed program is to bring an improved financial status to those who adopt it.

In any section of Texas where feed crops may be raised farm families may select hogs, chickens, milk cows, beef cattle, sheep or any combination of these and by studying the business of feeding, breeding, marketing, increase the farm income and establish a business that will pay throughout the year. In the famous cotton growing regions of the state, experts advise that each farmer continue to plant a few acres of cotton every year, just so they won't get homesick for the disappointment that is usually brings.

In many sections of the South, however, where cotton, feed crops and cows have been combined in recent years, the yield of cotton has been but slightly reduced and the profits to the farmer who grows more cotton on fewer acres has been greater and more satisfactory.

Many Brazos county farmers during the coming twelve months will be making their choice as to what phases of livestock raising they will choose as a means of increasing their farm income. Bryan's job is that of supplying the market for whatever farmers in this trade territory find it profitable to raise.

FAGINS ARE JAILED BY
MEXICAN CITY POLICE

(By Associated Press)
MEXICO CITY, Mex., Oct. 16.—In rounding up a band of robbers here, detectives discovered a school for thieves, where novices were taught the art by "professors" and given diplomas upon finishing the course.

The band, 22 members of which are in jail, kept books in which its exploits and proceeds were noted.

CITY COMMISSION MEETS

The city commission will meet in adjourned session tonight at the city hall, at 7:30 o'clock.

Daily Eagle want ads will sell those ads and ends about your premises.

Aggies Face Probable Trouble In These Horned Frog Stars

Aggie Squad in Good Shape Now for Game Saturday With Horned Frogs; Exciting Contest Is the Expectation

Dorsey At Half Will Make 1929 Debut In Game Saturday; Is From Fort Worth

COLLEGE STATION, Oct. 16.—Victories over strong inter-sectional rivals last week having definitely placed their teams as outstanding contenders for Southwest Conference laurels, Coach Matty Bell of the Texas Aggies, and Coach Francis Schmidt, of the T. C. U. Horned Frogs, are expected to leave nothing unused in their bags of football tricks and tactics when they place their teams on the field to blast the cap off their 1929 conference schedules at Fort Worth, Saturday.

Early games of both teams indicate that both contestants have effective aerial attacks and baffling wide-open systems of play which are expected to make Saturday's game look as one replete with all the action and color that daring offensive tactics can bring.

Coach Frank Anderson, Aggie track and freshman grid mentor, who saw the Horned Frogs trounce the Centenary Gents last Saturday, characterized the T. C. U. eleven as "one of the strongest in the history of T. C. U. and one of the smoothest-working, least excitable teams I have ever seen."

The Aggie coach also described Howard Griggs, veteran Horned Frog quarterback, as "one of the best passers the Southwest has

hoisted in several years." It was largely due to this sterling backfield ace that the Frogs were able to thoroughly perform their task against the Gents last week.

Though slightly hampered during the early part of the week by the absence from practice of Joe Brown, center; Roscoe Van Zandt, guard; and Hollis Bible quarterback, the Aggies, acting upon these reports on the Frogs, wasted no time in getting down to intensive training for their T. C. U. fray and their week's work is being featured by daily scrimmages against T. C. U. plays and formations as presented by Coach Roswell Higginbotham's Aggie freshmen.

Much attention has been given to perfecting a defense especially for the offensive play of the Horned Frog eleven, and several new offensive plays instituted particularly for use Saturday indicate that fans may keep their eyes open for plenty in the way of surprise plays against the Frogs.

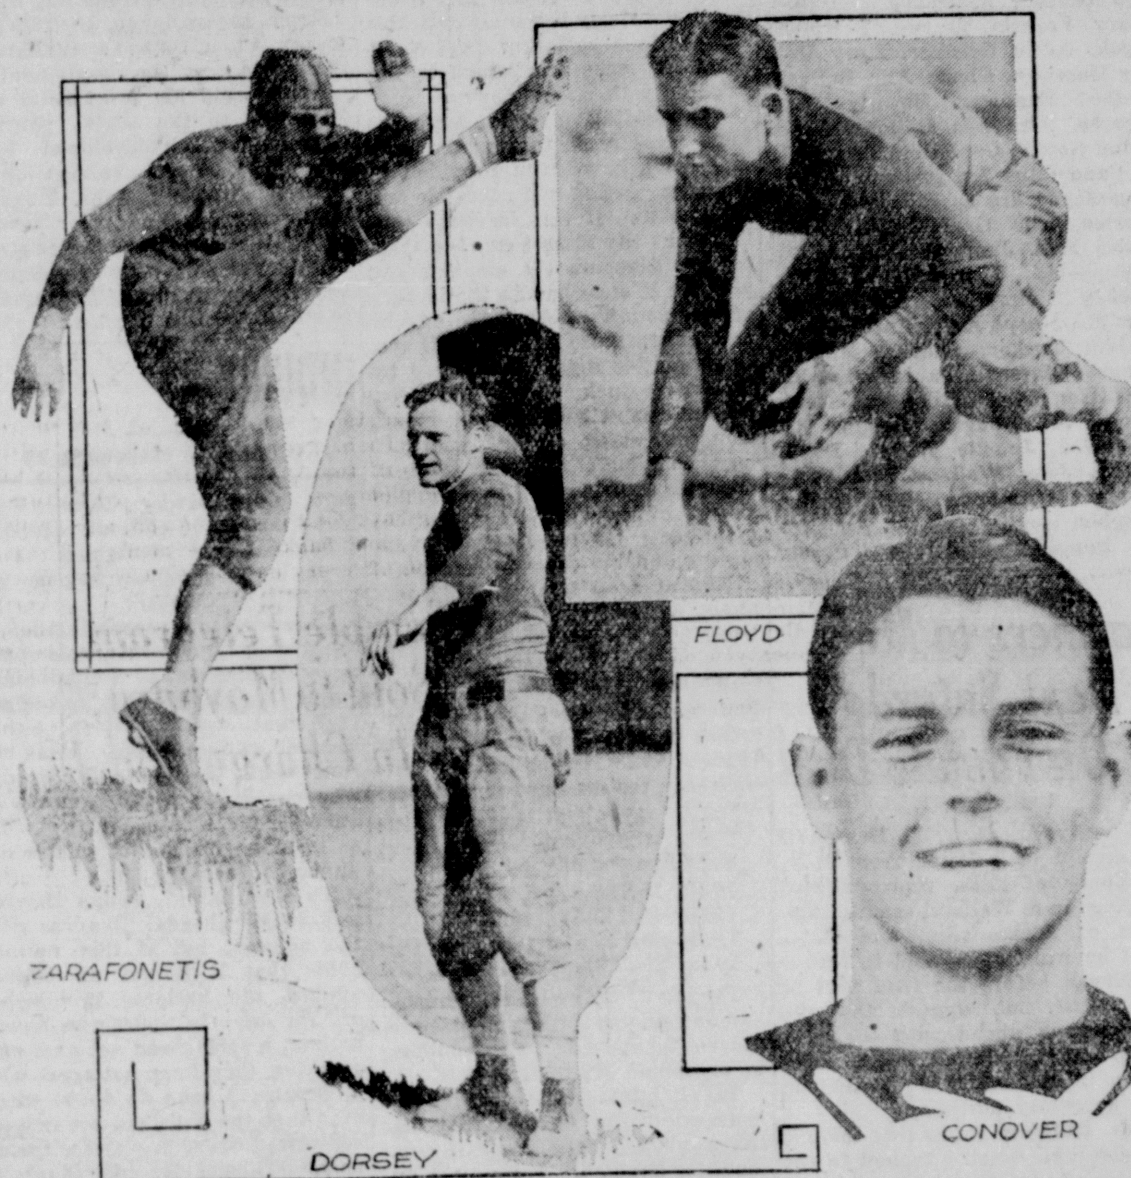

Bible, Brown and Van Zandt, who were all out with minor injuries early in the week, are expected to be in tip-top shape when Coach Bell takes his team to Fort Worth Saturday. No really serious injuries resulted in the Kansas Aggie game last week.

Of particular interest to Aggie fans will be the 1929 debut of Ralph Dorsey, Aggie half, who, because of a broken hand, has not participated in a single game this season.

It is interesting to note that this dangerous triple-threat man of the Aggies will make his initial bow of the season in his home town, Fort Worth, Leonard Clark, who got into action against the Kansas last week, is another back whose recovery enhances the chances of the Aggie eleven.

Subscribe for the Daily Eagle and know what happens.

FOUR VETERANS BULWARK AGGIE BACK FIELD

COLLEGE STATION, Oct. 16.—Dorsey, Conover, Zarafonitis and Floyd—these four veterans of the Texas Aggie backfield are expected to figure prominently in the Aggies' offensive on the invasion of the T. C. U. Horned Frogs' liar at Fort Worth by Coach Matty Bell's charges next Saturday, Oct. 19.

Ralph Dorsey, Fort Worth boy who only recently returned to the Aggie lineup after being out some time with a broken thumb injured early in the season, is not only a ball totter of merit but one of the outstanding passers of the conference as well.

Last season's performance in the Aggie backfield led to his selection by several critics for an all-conference berth at half.

Brooks Conover, Dallas, triple-threat man, is another fleet-footed half who is putting in a strong bid for all-conference honors. He is now at the head of the list of the Aggie ground-gainers this season.

George Zarafonitis, Breckenridge, hard-plunging fullback and defensive end of the Aggies, is another triple-threat performer. Besides doing a large part of the passing, running and plunging of the Aggies, Zarafonitis has been bearing a large part of the burden as a punter.

Bull Floyd, Rosewood, transferred from guard where he lettered last fall to half because of his speed and driving power, is considered by many critics as the strongest defensive back on the Aggie team. He is also a mainstay of the Aggie offense as an interference runner. It was partly due to his ability in his department last year that he was shifted to the backfield.

Conover and Dorsey will be playing against the Horned Frogs next Saturday for the last time during their college careers, as they will complete their eligibility with the Aggies this fall. Floyd and Zarafonitis are juniors.

Rye News

The Rye school opened Oct. 7, with an enrollment of 35. We are an enthusiastic bunch of boys and girls trying to do our best in school and club work.

The floors of our school rooms were oiled the week before school opened. It has improved the looks of the rooms very much.

Helen Kopecky of the Rye 4-H Club, will leave for Dallas Oct. 21, to attend the State Fair. Helen won the trip on her canning, record book and story.

Miss Lucy Merka, a nurse in the Cameron hospital, spent Sunday with her parents, Mr. and Mrs. Joe Merka.

Robert, Lyndell and Edwin Calka of Wheelock spent the week-end with their grandfather, Joe Kopecky.

Misses Julia and Christine Wy-molo of Edge are visiting their uncle Frank Hobarta.

Mrs. John McDowell and sons, John and Clarence of Houston are visiting here with Mr. and Mrs. Joe Merka.

Millican News

Mrs. Jim Cane of Roans Prairie visited relatives in Millican last week-end.

Mr. and Mrs. Joe McGregor, Mr. and Mrs. Malcolm McGregor and Miss Mildred McGregor of Houston visited Millican relatives last week-end.

Miss Bell Bradley has accepted a position as cashier in Camp Cafe in Navasota.

Mrs. Emma Williams and Miss Nannie Mae Williams are going to Roans Prairie for a few days visit. Correspondent attended Noah's Ark in Navasota last night and the fallacy that people do not like a clean show was exploded by the attendance record last night.

Edge Items

The O. Henry English Club of the seventh grade met Wednesday afternoon in regular meeting. After the business was attended to, a very interesting program was rendered. We were glad to have with us a visitor, Miss Bertha Mac Elliott.

Oscar Joost, a brother of Mrs. C. Schulz and his friend Bryan Powell, both of Houston, have been visiting Mrs. Schulz the past week.

Norman McDonald, who has been in Houston, visited his parents, Mr. and Mrs. R. R. McDonald the past week.

Miss Marie Boenigk spent the week-end in Tabor visiting in the home of Misses Ruby and Bertha Walker. Miss Ruby Walker spent the week-end at home from North Houston, where she is teaching this year.

The Tabor basketball boys team and the Edge team met on the Edge court Friday afternoon. The score was Tabor 27, Edge 9.

Miss Kathryn Wilson, who has been attending school in Norman, Miss Merle Hill, who is working at College Station, spent the week-end at home.

Eldrid Henry, who is attending school in Houston, has been spending a few days at home with his parents, Mr. and Mrs. W. R. Henry.

Bryan Hi Bears Schedule Games Next Two Weeks

The Bryan High Bears (colored) have two games scheduled to be played here that are expected to prove of more than usual interest.

On Friday, Oct. 18, that team will meet gridsters from the Houston County Training School on the field at West Side Park.

The following week-end Oct. 25, a team from Booker T. Washington High at Houston will engage the "Bears" on Forrest Field.

This arrangement has been made by colored school officials in full cooperation with the Bryan Athletic Council in charge of Forrest Field and a real demonstration of good music, spirited singing and organized pep squads is to be a feature of the afternoon's entertainment.

It is expected that many white football fans will witness the game played on Forrest Field.

Shot Riddled Body of Negro Woman Found by 7-Year Old Son in Cotton Field Where She Had Been Working

Trudging home from school after the rain yesterday, fording Thompson creek which was swollen by the downpour, and thinking of helping his mother in the cotton patch, 7-year-old Tommy Davis, negro, found his mother, Kessie Davis, 38, lying dead in the patch. Later investigation showed that she had been shot twice at close range with a shotgun. One charge entered her right shoulder and the other struck her full in the face.

Last night Justice J. T. McGee held an inquest in the case but only found for the time being that the woman had come to her death at the hands of some person unknown to the authorities. Sheriff Reed and Deputy Sheriff Lon Baker also were working on the case and went to that section this morning in an effort to locate the person who fired the shots that killed the woman. So far no motive has been found for the killing.

Women Are Diminishing Force in Industry, Opines Henry Ford, Who Believes Home Their Opportunity

"If women are wise, they are a coming power, but a power in the home, not in industry," Henry Ford says in an interview to be published in the October issue of Pictorial Review. "Homes are the motive of man; industry exists only because in the end it ministers to homes," he declares.

"Women are a diminishing, rather than an oncoming force in industry. As precision increases in industry, women will tend to decrease and disappear because they are not precise and mechanically-minded. They have not the patience to make or handle machinery and they have not the interest to develop in mechanical work."

"Girls are not of an inventive turn of mind. They are more apt to take orders than to forge ahead for themselves. In that they are like the average working man. You know, some say that working men want to run their shops. They don't; it is too much trouble. After a week or two the men prefer to go back to the sure and comfortable routine of letting someone higher up have the responsibility."

"Women are the same way. Women don't want to think on mechanical and industrial matters. They don't want to think much even in their home life, except in human crisis, and then they are resourceful and arise nobly to a situation. It shows the good there is in the background, but it is passive. Generally speaking, even at home they don't want to make decisions. I suppose it is harder for women to make decisions in daily life because it takes experience to make decisions, and they haven't the experience."

Mr. Ford was asked how women are to get the experience needed to make decisions if they are to be shut away from the world where men acquire their knowledge and resourcefulness.

"A woman can get all the experience she needs right in her own home if she is energetic and positive. That's up to the woman and what they want of life, because they will get what they want if they want it badly enough. But I don't believe that their natural and general characteristics fit them for successful penetration of industry. Their instincts are better than man's but of a different order; as workers whether in the home or in industry, they are dependable but show no initiative."

"The mechanical age means the comfortable age. Women will be released from the drudgery they won't put up with any longer. There will be electric power all over the country—away out in the lonely farm-lands just as much as in the cities. Indeed, industry won't concentrate in cities any more. The comfortable age means that there will be no lonely farm-lands where women will be shut up in their kitchens to monotonous, unending drudgery."

Mr. Ford was asked what use leisure will be to women unless they can put something into it to make it really creative.

"If release from drudgery means bridge and gossip and endless sterile club meetings, if women are released to spend their time in third-rate emotional day-dreams in moving picture theaters, doesn't that hurt us and our families emotionally and spiritually?"

"Unless power is used it has no value," replied Mr. Ford, "and leisure is a power which, if misused becomes harmful. It may be that

whom you speak have it too easy. It may be that they need to suffer a little. Perhaps they need less privilege and more courage. American women must pay for their release from drudgery and they can pay in only one way—that is to study and work at their jobs of being better wives and mothers."

"I think the whole situation lies about like this: that men and women must learn to work together rather than each pull against the other as they do today. If men and women work with a single aim, and as partners, something a great deal better will come out of it than is the result now, with each one taking a different course and insisting on his or her rights and individuality and self-expression. They are not competitors but complements. A new kind of power is born of complete partnership between a man and a woman."

Prospect

George Watson and family have located on the Emory place. Mr. Watson comes from Madison county and we are glad to have him as a citizen.

Durwood Bean and family were visiting at the home of H. C. Sheffield Sunday. Mr. Bean is also from Madison county.

Mrs. Olin Ford and Miss Caroline Keefer of North Zulch were callers at the McDonald home last week.

Ed Beal and wife of Goose Creek visited home folks the first Sunday, returning home in the afternoon.

G. M. Terry has faith in the coming of rain. He has recently weatherboarded his house and seems determined to keep "dry."

Mr. and Mrs. D. J. McDonald recently received a card announcing the birth of a daughter born to Mr. and Mrs. Steele M. McDonald at McCombs, Texas.

Dr. Dunn of College visited the McDonald home last week and blood tested a flock of 71 Barred Plymouth Rock chickens, finding only five which reacted to this test.

Jack Guido and Miss Lucy Corrobbo of the Prospect neighborhood were married Saturday. Mr. Guido is a practical young farmer and Miss Lucy is well trained in the art of home making. Their friends predict for them a happy married life. Many relatives and friends from Houston and other points came to witness the ceremony.

Mrs. Earl Carroll of Waco visited her mother, Mrs. G. M. Terry, the past week, returning Saturday.

D. W. Davenport has been on the sick list for several days. We are glad to report that he is better.

INSPECT SCHOOL BUILDINGS
An inspection of the Travis and Bowie School buildings was made today by members of the Bryan city commission, accompanied by Bertram E. Giesecke, of the firm of Giesecke and Harris, architects for the school buildings and also for the municipal building.

MEXICAN SOLONS GIVE PAY FOR GOOD ROADS
TOLUCA, Mex., Oct. 16.—The state legislature voted unanimously to surrender its daily expense allowance of \$2.50 (dollars) for each member so the money may be used in building roads.

Grimes Co. Fair To Be Opened by H. H. Williamson

H. H. Williamson, vice director of Texas Extension Service, will open the Grimes County Fair at Anderson with an address on the present trend of Texas agriculture, the farmers problems and their solution. This program will be inside the fair grounds at Anderson at 10:30 Wednesday morning Oct. 23.

Mr. Williamson was born and reared in Grimes county graduating at A. and M. College in 1911 and since that time he has been connected with extension work in Texas. There are few men in the state as well acquainted with the farmer's problems and their solution as Mr. Williamson. During the time he has been engaged in Extension work he has been in close touch with agricultural conditions in all parts of the state making a study of the agricultural problems and endeavoring to find the remedy for them. His knowledge of this work is based on the experience of farmers from the lower valley to the great plains section, from the rice grower in South Texas to the cotton farmer in the cotton districts.

The Fair Association feel that they are fortunate in securing Mr. Williamson to open the Grimes County Fair as they realize that his address will not only be of interest to the farmer but to the banker, businessman and others in the county. Every one who can should be present to hear Mr. Williamson and be present at the opening of the fair. Navasota Examiner.

Scoring Ace

Associated Press Photo
Virgil Gilliland, Baylor University halfback, probably will be one of the high individual scorers in the southwest conference this year.

ACTION TAKEN THIS MORNING BY C. C. BOARD

City Development
Committee To
Be Nucleus

AIRWAYS ENGINEER
Of U. S. Department
Of Commerce Is
Asked Here

Organization of a stock company for the purpose of financing the purchase of an airport location for Bryan was endorsed this morning by the Bryan and Brazos County Chamber of Commerce. Fred L. Cavitt, chairman of the city development committee, was instructed to take his committee and organize such a company to the end that the first steps toward a modern airport here might be taken.

The resolution endorsing this project and suggesting this method of procedure was as follows: Resolved: That the Chamber of Commerce endorse the move for an airport; that the chairman of the city development committee, F. L. Cavitt, take his committee and organize a company with the end in view, first, of raising \$5,000 or \$6,000, so that further steps could be taken toward getting the government inspectors to designate a suitable location, and carry forward the plans for the maintenance of an airport, and to proceed with such other details as are necessary.

Mr. Cavitt reported that he had heard from A. H. Wait, of the United States department of commerce, who visited Bryan once in the interest of an airport here, and that Mr. Wait, who has been transferred to California, referred him to G. W. Miller of Fort Worth, airway engineer of the department for Texas. Mr. Cavitt has gotten in touch with Mr. Miller and has urged him to visit Bryan in the near future to inspect the available locations here and designate one that will answer government requirements.

The proposition made by Mr. Wait was that if a location that met with the approval of the government were purchased or leased the government would equip it and maintain it, or would turn it back with equipment free of all charges to be maintained at local expense. The equipment is said to cost approximately \$10,000 for an airport that would meet the requirements of the federal government.

Discussion of highway improvement brought out the fact that the campaign committee which functioned before the recent bond issue election proposed to remain in existence to aid in the work of improvement in any way possible. Travis B. Bryan, chairman of the highway committee, reported this and also stated that the committee would keep in close touch with the county officials and also would call on the state highway commission in reference to the building of state highways in the county, for which \$500,000 was provided in the recent bond issue election.

The question of marking Highway No. 6 in such manner that tourists may find their way thru the city readily was discussed and the highway committee was instructed to get in touch with Division Engineer J. E. Blair in this matter.

Present at the meeting were J. Webb Howell, Travis B. Bryan, F. L. Cavitt, E. E. Yeager, W. K. Gibbs, J. S. Caldwell, Oak McKenzie, M. F. Vitopol and A. S. McSwain.

Action on Notes Settled Monday; \$25,000 Involved

The case of the Cole Hardware Company against J. B. Dunn, which has been in the courts of Brazos county for some time, was settled by agreement of parties yesterday and a judgment for approximately \$16,000, according to report, entered against the defendant.

The suit was based on notes stated to have been given the plaintiff by the defendant, which involved a total of approximately \$25,000.

Attorneys in the case were Henderson and Hoyle and Armstrong and Armstrong for the plaintiff and Barron and Ware, Judge Lamar Bethea and Woods and Tyson of Franklin represented the defendant.

DAMAGE SUIT SETTLED

The case of Sam Dunlap against the I. and G. N. Railroad Company, suing for damage to stock, was settled Monday afternoon in district court and the case dismissed from the docket.

Boys' And Girls' Club Department

Club Notes and Farm News by County Agent C. L. Beason and Home Demonstration Agent Lucy Givens

Great Waste Here

In the October number of the Poultry Tribune, O. A. Hanke, editor, formerly with the A. and M. College of Texas, writes interestingly of the George A. Hormel and Company canning plant at Austin, Minn. At this plant 1,000 chickens per hour are canned, the process using the whole fowl which is government inspected, thus assuring the public a dependable food product wherever Methodists reside, or people enjoy milk-fed poultry. Mr. Hanke states that this new process "has industry astir," and within 60 days has become a nationwide product. "There is but little doubt," says Mr. Hanke, "that Swift, Armour, and a number of other packers will engage in some ramification of this canning project."

With such a plant located in Brazos county, where dairy products will some day supplant "King Cotton," not only our milk fed poultry, but also our hogs, sheep and beefs could be canned into the choicest meats, "tempting the appetites of the gods," and bringing prosperity to our farming people. Our berries go to waste. Our vegetables go to waste. Livestock goes to waste, and wild grapes enough to make a million gallons of jelly a year, go to waste all because we do not have facilities for canning and preserving.

To Run Terrace Lines

At the Tabor community meeting on last Friday night all the boys present volunteered to run terrace lines on at least one farm during this fall and winter. Lynn Sample is chairman for the Tabor

community in the state-wide terracing campaign now being put on throughout Texas.

Suggests Terracing School

Fletcher Pool is the first chairman of the several terracing committees to send in a questionnaire relative to terracing. He reports that there are 15 farms in the Millican community that need help in terracing, and suggests that a terracing school would help. All right, men, who is next? Let's go.

Governor In 4-H Club

Because of his interest in club work, Governor W. J. Holloway of Oklahoma has been made an honorary 4-H Club member, the club emblem entitling the governor to all the "rights, lights and benefits" of the order.

Mil o Maize Without Rain

Roy Robinson, manager of the Higgs-Robinson farm in the Brazos Valley, brought a sample of fine maize heads to the county agent's office Saturday. Mr. Robinson stated that this maize was produced without rain, and it is estimated that the production would be from one and a half to two tons per acre. He thinks the grain sorghum a better feed crop than corn.

Send In Club Reports

What about that club report? Don't fail to send in the card sent you some weeks ago. If the card failed to reach you, as many have so stated, then ask for another card. We must have the report for this year. Without all reports being sent in, our quota to the Dallas Fair next year, will again, be light.

Women of Bryan Plan to Attend State OES Meet

Mrs. R. L. Brown, district deputy grand matron of District No. 1, Order of the Eastern Star, Mrs. Thos. Lundin, matron of Bryan Chapter No. 222 and Mrs. M. R. Bentley, associate matron of Bryan Chapter, will attend the Grand Chapter of the Eastern Star in Texas at San Antonio, October 22, 23 and 24. Other members of the order living at Bryan and College Station are expected also to go to San Antonio for all or part of the grand chapter session, according to intentions announced at the regular meeting of Bryan Chapter on Monday evening.

Mrs. Thos. Lundin as worthy matron presided over the business session last night during which matters largely of routine nature received action of the chapter.

The regular meeting in November will be designated as "Brother's Night" and Masons who are members of the Eastern Star will be special guests for the occasion.

PEOPLE'S COLUMN—

(Continued from page 1)

guide books and post cards to choke a mule and have lots that I haven't guide books of.

First we saw a show the night we arrived. It was in a wonderful house and really was good. It was a variety show including ventriloquism, tumbling, dancing and the like.

The first day we went to the zoo, Maram Tussaud's Wax-Works, and the famous Tower of London. In the zoo we found every animal, fish, or bird conceivable. Our old friend the horned frog was there and with him we found the rattler, water moccasin, blacksnake, chicken-snake, and even the coachwhip and copperhead. Penguins were there as well as the rare European Bison. We saw many American Bison, not to mention the usual elephants and other members of the far-flung animal family.

Their aquarium was quite interesting and fixed in such a manner that everything was quite visible. The cases were set in the wall and light was admitted so that while I was in darkness the fish were brightly illuminated. They had three halls. The freshwater hall, the sea water hall, and the tropical hall.

Madame Tussaud's exhibition is perhaps the greatest in the world. Here we saw some five hundred of the world celebrities in wax. Our American presidents were there as well as Lindbergh, Dempsey, Pershing and others. The royal family was pictured as well as all the English Kings from the very first. Tableau's depicting such events as the granting of the Magna Carta, the death of Lord Nelson, the execution of Mary Queen of Scots, the murder of the young Princes, and the body of Napoleon as it lay in state were there with such reality that it was stunning. You cannot imagine the difficulty with which I experienced in trying to tell the real men in uniform from those in wax. These fellows were distributed about the place and sometimes when I passed to view a good work the dark guy spoke to me—he was one of the attendants. Then again I would ask my way from another only to find

that he was wax. The Tower of London is exceptionally interesting because of its antiquity and the many events that have occurred here. Now the original building which was built by William the Conqueror, and known as the "White Tower," is used as an armory. Here all varieties of ancient armor as well as guns and pistols of early origin could be seen.

The Bloody Tower is over the only one gate leading into the interior of the courtyard and for that reason it was called the gate tower. A portcullis is still here which was put there when the Normans built the wall. It still works and about five years ago it was let down to protect the honor of men who still claimed it to be in working order.

In the Bloody Tower we found that such distinguished people as Sir Walter Raleigh, Mary Queen of Scots and others stayed only to at last give up their heads upon the scaffold, the site of which was shown to us.

After hearing about the dark history of the Bloody Tower we made our way to the Jewel House. Here we saw all the Royal jewelry including the state crown with nearly a thousand diamonds. This was recently renovated and many new jewels were added including the large diamond known as the "Stars of South Africa." This was cut from the "Cullinan" rough and weighs 309 3-16 carats.

When we had finished the Tower it was time to go back up to the room. Here I shaved and then we went down to eat at Lyon's Corner House. Lyon's has cafes all over the city but this "Corner House" is the finest. It is wonderful and the prices are quite reasonable. A huge dining room but a good meal is obtainable for fifty cents. Then in the lobby we found the candy shops and in short, everything possible.

This morning we saw the Houses of Parliament and Westminster Abbey. This afternoon we went out to the National Radio and Engineering exhibits. Spent a whole afternoon out there and even then I suspect that I could still find something that I didn't see.

M. EDWIN HAYES.

Will Open Bridge Thanksgiving Day

AUSTIN, Oct. 12.—Sam D. Low Washington county judge, here Friday, said the \$350,000 bridge over the Brazos river in his county is to be opened about Thanksgiving Day and that later a big celebration will be held in commemoration of the opening. Nearly two years were required to build the bridge, which is on Highway No. 20 connecting Austin and Houston.

For several years a ferry has been in intermittent operation across the Brazos at the bridge site. Its service was uncertain, being suspended if the water was too high or too low.

INTEND TO MARRY

Notice of intention to marry and applications for marriage licenses were filed by four couples Saturday afternoon with County Clerk Jess B. McGee. They were Charles E. Hanson and Stella Gwen Cole; Joseph Wells and Madalee Woodard; Benjamin Herrera and Romana Sustaita; Johnnie Williams and Elenora Johnson. All are from Bryan.

Midget Wedding For Travis P-T-A Being Planned

"A Midget Wedding," a musical event which is sponsored by the Parent-Teachers Association of the Travis school, is now being planned for Nov. 9, to be presented at the Stephen F. Austin high school auditorium. The principals in this wedding party will be not less than three years of age nor more than five and will be chosen by popular vote. A large wedding party and an impressive choir also will be selected.

Ballot boxes will be placed in Canada's drug store, the "M" System store and the Yeager-Edge hardware store. Votes may be deposited at 10 cents per vote and the girl receiving the highest vote will be named the bride and the second highest the maid of honor. The groom and the best man will be chosen in the same manner.

The committee in charge, headed by Mrs. Roy Danforth, chairman of the music committee of the Travis P-T-A, wants the names of all children whose ages make them eligible. A tentative list already has been secured.

Candidates for the honor of bride already announced are Martha May Lawrence, Betty Ann McCarthy, Martha Jane Porter, Alice May Brewer, Mary Helen Ball, Delia Margaret Parker, Sue Bethany, Florine Lenz, Wilma Louise Brayton, Ann Howell, Eugenia Ann Miller, Betty Jo Overt, Jean Burdette, Johnnie May Tatum, Florine Fagan, Jewell Nowell, Mary June Hemingway, Nell Louise Wilson, Emma Jane Spell, Mary Worth McKenzie, Billie Burke Johnson, Cecile Gerson, Rosemary Fountain, Mary Francis Yeager, Betty Jo Cook, Adele Griesser, Mary Hester Harrison, Cleota Ann Bullock, Betty Benbow, Beverly Ann Sparks, Alta Lee Bullock, Katherine Royall, Cora Beth Powers.

Candidates for groom already announced are as follows: Lamar Curlee, Ellie Garrett, Jr., Allan Shiro Hall, Jimmie Webster, Bill Chambers, Rawlins Horlicher, Dickey Holmgren, Stuart Barton, Jr., Joseph Kern, Rufus White, Calvin Tucker, Charley Murray, Monroe Marshall, Paul Martin, Byron Alan Jones, Billy Fry, Rolan Nunn, Jr., Douglas Rycklich, Bill Downard, Jimmie Wilson, Bobby Webb, John Wallace Poindeexter, Bobby Williamson, Billy Eades, Stephen Hughes, Jr., Douglas Conlee, Donald Conlee, John Crawford Locke.

Farmers to Meet Next Saturday On Tomato Deal

County Agent C. L. Beason is in receipt of a letter from J. D. McEnery of Alto, representative of Newton & Wallace, tomato shippers of Jacksonville, and states that he will not be able to return to Bryan before the first part of November, but suggests that the farmers go ahead with their tomato organization at once, especially in the matter of getting up the necessary acreage.

Mr. McEnery states that there is considerable work attached to the matter of putting on a new tomato deal, but that he will do everything possible to help make the enterprise a success in Brazos county, adding, "There is no doubt for your section that the tomato industry will some day be a big industry and beneficial to both grower and business people."

Answering the argument by some that overproduction may result with increased acreage, Mr. McEnery says, "There are some 12 to 16 new points going in this year, but all these new points have a tonnage of not more than 400 cars, most likely 300 cars, and this in itself will not have any effect at all on the 12,000 car market that moves during May and June of each year."

County Agent Beason suggests that a report on acreage be made on next Saturday, October 19. If the acreage can not be secured, then the Jacksonville people will be notified accordingly. If this enterprise is to be tried out, it would be well for each farmer so interested to concern himself about this acreage proposition, says Mr. Beason. "We must act now, if we act at all," he concluded.

KURTEN BAPTIST WOMEN EFFECT ORGANIZATION

The Kurten Baptist church women will be organized this afternoon at 3 o'clock by a committee from the Woman's Missionary Society of the College Avenue Baptist church of Bryan. Those going out to Kurten this afternoon for the organization meeting are Mrs. D. D. Jolly, Mrs. T. R. Nelson, Mrs. McDuff Simpson and Mrs. H. L. Whitley.

This is a part of the extension work which the auxiliary of the Creath-Brazos Baptist association has been doing among the various churches of the organization.

More Hopeful, Too

The theory of heredity is essentially fatalistic. The theory of environment is far more inspiring.

HOOVER TO—

(Continued from page 1)

47 of these are built in conjunction with movable dams so that during normal high water stages the river is open with the exception of two permanent dams. It is only during the low water periods that the movable dams are raised to provide the 9 feet of depth. This opening up of the Ohio is of the utmost importance to the entire Middle West. It is the first real step toward bringing back an important era of river transportation. It comes at a time when low cost bulk transportation is an outstanding need for this territory. Higher railroad rate levels have set the inland part of the country farther back from the seacoast markets and the opening up of the Panama Canal has brought the seaboards nearer together. Unless full advantage of low cost water transport the Middle West is quite likely to suffer materially both in industry and agriculture.

One of the things that is helping to bring back river traffic is the economy of new types of towing equipment.

A glance at one of the towboats employed to move the great flotillas of fifteen of twenty 1000-ton barges is sufficient to bring a realization of the importance that economical power plays in the scheme of things. The day of the steam boats is passing and with it perhaps some of the old romance attached to the river packet trade that flourished fifty years ago.

Another important feature which has become more and more prominent with the erection of the control dams and locks is the matter of maneuverability. It is common practice to control a motor boat entirely from the pilot house which obviously is a most desirable feature in negotiating close clearance in locks and which is not feasible with steam power.

Transportation on the Ohio has been steadily increasing as locks and dams have been provided to make navigation more feasible and reliable and if this increase continues at the same rate, the Ohio soon will regain the commanding position it once had in the history of our country before the advent and general use of the railways. Commodities regularly shipped by this route include coal and coke, cement, sand and gravel, stone, iron and steel, oil and gasoline, logs and lumber, packet freight and other unclassified items to the extent of approximately 21,000,000 tons in 1928 an increase of almost 1,000,000 tons over 1927.

The average haul in 1928 was about 67 1-2 miles as against 60 1-2 in 1927 indicating in 1928 better than 1 1-3 billion ton miles of traffic as against about 1 1-5 billion ton miles in 1927. The increase in traffic on the Ohio from 1926 to 1928 is indicated very clearly in the accompanying table:

1922, 6,291,826 tons
1923, 8,280,683 tons
1924, 10,866,683 tons
1925, 15,737,072 tons
1926, 19,159,788 tons
1927, 20,128,518 tons
1928, 20,938,267 tons

During 1928 the total tonnage handled on the Ohio and its tributaries amounted to something in excess of 59,000,000 tons.

It is interesting to note in this connection the change that has taken place in the class of commodities handled. From 1905 until 1922 the coal and coke handled kept close to a general average of approximately 5,000,000 tons a year; since 1922 there has been a uniform increase to almost 10,000,000 tons in 1928. Logs and lumber, packet freight and unclassified item of a miscellaneous variety occupied an important place in the river traffic from 1905 to 1910 since when it has dropped off materially. Stone, sand and gravel has increased from a nominal figure in 1920 until now it exceeds the quantity of coal and coke handled. Iron and steel products beginning from a small start in 1910, have shown a slow increase up to 1925 since when there has been a very marked tendency towards the use of the river for that purpose. Iron and steel products have the longest haul of any of the commodities considered, the average being approximately 250 miles as against about 160 for cement, 140 for packet freight, 125 for gasoline and only about 80 miles for coal and coke. Iron and steel are handled largely from Pittsburgh all the way to Cairo whereas coal is transported chiefly from Pittsburgh to Wheeling and from Huntington to Cincinnati.

A detailed analysis of the 1926 tonnage which is available shows conclusively the difference existing between the water haulage cost of the tonnage using the Ohio River and the cost of moving the same amount of material by rail amounting to approximately \$6,000,000 which is an amount sufficient to pay interest at 5 per cent on the investment besides operating, maintenance and depreciation charges. This fact furnishes reason to suppose that with the complete project the use of the river will greatly increase.

An interesting fact in connection with the present traffic is that nearly all of the fleet now using the river is being handled either by privately owned carriers or by contract. It is said that less than 5 per cent of the total tonnage is common carrier service. At present the standard for barge construction is 175 feet long, 26 feet beam with usually an 11 foot depth of hold and on a carrier of 1,000 tons, a draft of 9 feet which is equal to the capacity of 25 freight cars.

Prior to 1921 the great majority of barges were of wood construction, but due to the increased cost of lumber and to the longer life and greater capacity of steel hulls, more and more barges are being built of steel.

No precautions are being overlooked to keep this highway in the best of condition. The federal government keeps dredges constantly employed to maintain the channel and to remove obstructions. Channel lights are installed throughout the course and the result is that the Ohio is now a serviceable stream for navigation the year around. The advantage accruing through cheap waterway transportation is now available to any and all who will take advantage of it. It only remains that a greater number of shippers realize these savings and become "river minded."

GOVERNOR MAY—

(Continued from page 1)

approval until he promised that he would not be a candidate for the office in the next election. This was interpreted to mean that Calhoun wished to take no chances on a new "ring" perpetuating in office. It was thought that a new sheriff would be named tomorrow when county court resumes.

(By Associated Press)
BORGES, Oct. 16.—John Heron White, representative to the Texas legislature from the 124th district, has resigned. District Attorney Clem Calhoun announced today in a newspaper statement.

White said his resignation was "not due to the acute political situation" which developed here subsequent to the assassination of District Attorney John Hughes, September 13, and prior to the declaration of martial law September 30 but said he was resigning because his duties as representative decreased his income.

INQUIRY—

(Continued from page 1)

Judge Dawson, former Kentucky attorney general, declared the widespread impression that it is not against the law to purchase liquor is erroneous.

Referring to a recent decision of the Circuit Court of Appeals of the Second District at Philadelphia, Judge Dawson said that he had not read that court's opinion, but it was his opinion that what the court really decided was that one who purchases liquor is not such an aider or abettor of the seller as to make him guilty as a seller under the federal law.

To that extent, Judge Dawson said in his charge, "I agree with the opinion, but if that opinion holds that it is not an offense against the national prohibition act for one to purchase liquor, without a permit and not on a prescription, then I can not agree with it, because I have no doubt whatever that the Volstead act intended to and does, in express terms, make it illegal for individuals to purchase liquor for personal consumption for beverage purposes."

He cited section 6 of the national prohibition act, which, he said among other provisions, declares:

"No one shall manufacture, sell, purchase, transport, or prescribe any liquor without first obtaining a permit from the commissioner so to do, except that a person may, without a permit, purchase and use liquor for medicinal purposes when prescribed by a physician."

"If the language just read," Judge Dawson commented, "does not prohibit the purchaser of liquor by individuals for personal consumption for beverage purposes without a permit, then I am incapable of understanding the meaning of language."

Section 29 of the act, providing a fine up to \$500 for the first conviction, and up to \$1,000 and imprisonment for not more than 90 days for the second offense, applies to persons purchasing liquor for beverage purposes, Judge Dawson told the jurors.

"I know it is frequently urged," Judge Dawson concluded, "that if you make it against the law to purchase, or if you enforce the law against the purchaser, you will hamstring the enforcement of the law, because you then can not get evidence against the seller and the manufacturer. Don't let that worry you for a minute. I have been on the bench for a little better than four years, and in that length of time we have handled between 5000 and 7000 liquor cases, and not in a single one of them has a citizen buyer ever appeared as a witness against a seller or a manufacturer."

IN THE LONG AGO

Taken from the Houston Post files twenty-five years ago: Bryan.—The management of the Central Texas Fair Association has announced that former Governor J. S. Hogg will open the fair with an address.

More Livestock For Texas Farms Now Encouraged

DALLAS, Oct. 15.—Another step forward in the encouragement of the feeding of more livestock on Texas farm lands will be taken here on Thursday night when the first meeting of the Texas Breeders-Feeders Association will be held immediately following the banquet to be given in their honor by the State Fair of Texas.

Farmers, ranchers, farm owners, and business men have been invited to attend the meeting and banquet. More than 75 county agents of Texas are expected to attend the meeting.

T. E. Jackson, president of the State Fair of Texas, will preside at the banquet, and will turn the meeting over to Frank P. Holland, president of the Breeders-Feeders Association when the business meeting of the association gets underway.

James E. Poole of Chicago, widely known writer on livestock and markets; Albert K. Mitchell of New Mexico, president of the American Hereford Breeders Association; J. B. Davis of Fort Worth, manager of the Southwestern Exposition and Fat Stock Show; W. B. Mitchell of Marfa, Texas, one of the biggest shippers of beef calves in Texas, and Professor H. Gramlich, of Lincoln, Nebraska, noted beef cattle specialist will be on the program for the meeting of the Texas Breeders-Feeders Association.

The Texas Breeders-Feeders Association was organized two months ago at Midland, Texas. Mr. Holland was elected president at the first meeting. He is also a director of the State Fair of Texas. It is the purpose of the organization to create a market for feeder calves in Texas. The organization is behind the Feeder Show and Auction Sale to be held as the feature of Beef Cattle Week of the State Fair of Texas. This sale will be held Friday, at which time it is hoped to auction off more than 750 calves to cotton farmers for feeding purposes.

Mission Workers First Christian Meet on Monday

The Woman's Missionary Society of the First Christian church met in three circles on Monday. Two circles met in Bryan and a third circle was organized Monday on the campus at College.

The East Side Circle met at the home of Mrs. Weldon Jones with 11 members and 8 visitors present. The morning session was taken up with finishing a quilt and at the noon hour a delicious lunch was served. The afternoon business session was begun with a scripture reading by Mrs. E. W. Glenn. Prayer followed by Mrs. A. F. Ainsworth. Report of previous meeting was read by Mrs. W. L. Dowling. The next meeting will be held with Mrs. E. W. Glenn at Edge apartments.

The West Side Circle held its monthly fellowship meeting at the home of Mrs. G. E. Adams, beginning at ten o'clock and continuing through the day. Quilting occupied the members in the forenoon and at 1 o'clock a bountiful luncheon was served.

The business session began promptly at 2 o'clock, with Mrs. J. E. Dishman, chairwoman presiding. Mrs. G. E. Adams made the opening prayer. Mrs. Joe Dickenson, secretary, read the minutes of the previous meeting. The fellowship meeting to be held the second Monday in November, will be with Mrs. C. L. Baker Sr. on West 24th Street. Ten members and one visitor made up the East Side circle meeting.

COUNTY COURT TAKES ACTION LATE MONDAY

Will Submit Matter
To Bobbitt This
Week

MEETINGS PLANNED

In Various Sections
To Plan Road
Work

Bonds for the proposed lateral road improvement of Brazos county, in the amount of \$250,000, were ordered issued Monday by the county commissioners court. This week the record of the election will be taken to Austin, for submission to Attorney General Bobbitt, in order that he may pass on the bonds before they are offered for sale or bids asked.

It is the plan of County Judge A. S. McSwain and the county commissioners to get to work on the proposed lateral road improvement as early as possible. To this end some meetings have been held and others are planned in order that the members of the commissioners court and the residents of the various precincts of the county may discuss the details of the proposed improvement in each precinct, though no departure from appropriations of money as set down in the election petition will be possible.

The first meeting was held last week at Harvey where more than 100 residents counselled with Judge McSwain and Commissioner Guy Boyett and reached an agreement about the improvement of the Harvey-Bryan road. The citizens agreed to give land for an 80-foot right of way and to start moving fences back immediately. They also will do what work is possible so that all the \$16,000 appropriated for that road will be available for grading and other final improvement.

This week County Judge McSwain and Commissioners Emmett Holland will hold four meetings. They will meet with the residents of Edge Wednesday afternoon at 2 o'clock. This meeting will be held at the Methodist church. Wednesday night, at 8 o'clock, they will meet with the residents of Tabor, at the community house there. Thursday afternoon at 2 o'clock a meeting of the two officials and the residents of Kurten will be held and Thursday night a meeting will be held at Reliance at 8 o'clock, in the school house.

Series of Talks By Major Sloan To Troop School

The second meeting of the Troop School for Reserve Officers will be held in room 7, Military Science building at 7:30 p. m., Wednesday, Oct. 16.

At this meeting Major Sloan will begin a series of talks on Organization and Tactics. All organizations from the G. H. Q. Reserve down through the battalion will be covered and these lectures will be followed by a number of small troop leading problems.

The course for this year is designed to cover subjects necessary for officers of all grades and branches and should prove particularly valuable to those contemplating attending camps next summer.

Daily Eagle want ads will sell those odds and ends about your premises.
